## **Purpose of this Manual**

The purpose of this manual is to provide you with an opportunity to become familiar with the AMEDD Force Readiness Immunization Tracking Module.

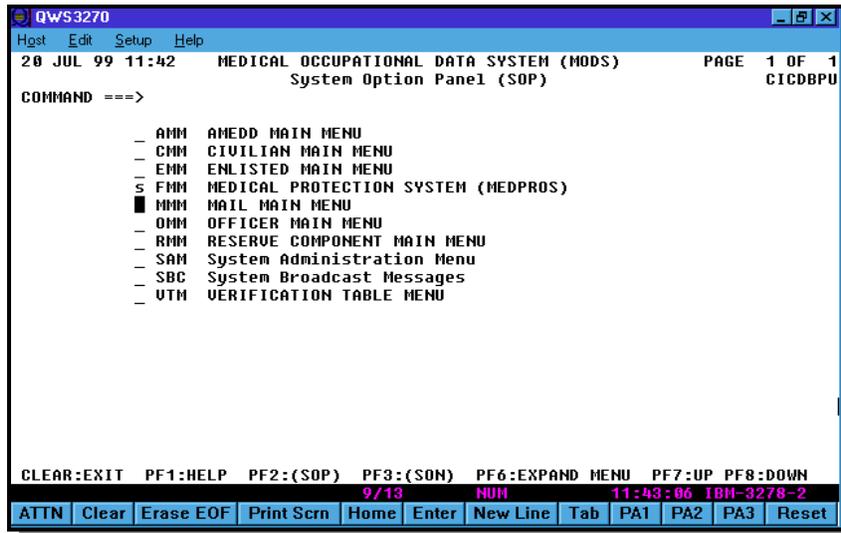

The Medical Operational Data System (MODS) resides on the NISA Mainframe platform located at the Pentagon. MODS, along with all of its stored data, resides in a central repository at the Pentagon instead of on your local computer's hard drive. All MODS users worldwide can access the very same data simultaneously. This allows MODS to function as a true real-time system. This means that data entered from any site in the world can be viewed by any other authorized person regardless of where they are located in the world or when they want to view the data. This gives the AMEDD a true view of AMEDD Readiness status.

This manual will provide you with an orientation to the following:

- ◆ Utilizing MODS Function Keys and Quick Navigation Commands
- ◆ Accessing the MEDPROS Immunization Module
- ◆ Inputting immunization data for a specific unit
- ◆ Updating and editing existing on-line individual immunization records
- ◆ Generating immunization status reports

## Navigational Hints

In order to help you maneuver around MODS quickly and efficiently, we have put together a few pointers. For a complete listing of MODS FUNCTION KEYS and QUICK NAVIGATION COMMANDS refer to the Supplemental Manual, Chapter 5.

```

### MODS Main Menu

This menu panel is an example of the different ways to select a menu item. The **MODS MAIN MENU** is called the System Option Panel (SOP). The UNIQUE PANEL IDENTIFIER can be located at the top of the screen in parentheses (i.e. SOP). These are also listed on the MODS menus just to the left of the menu title. You can select MODS sub-menus by:

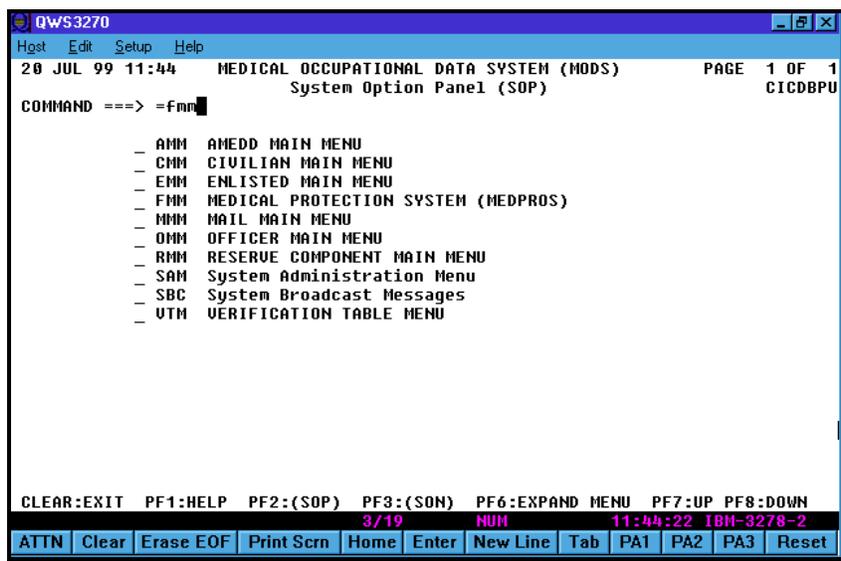

- ◆ pressing <TAB> to advance the cursor to the underscore located to the left of the menu item, typing "S" and pressing <ENTER>
- ◆ or using the quick navigational UNIQUE PANEL IDENTIFIER located between the underscore and the menu item title (i.e. FMM) in conjunction with the = sign.

At the COMMAND PROMPT, simply type "=FMM", then press <ENTER> to proceed directly to the MEDPROS Main Menu (FMM). You can do this from anywhere within MODS.

**COMMAND ==> =FMM then press <ENTER>**

You can bypass several MODS menus by using this technique.

## Medical Operational Data System

### MODS Main Menu

Aside from using the two methods mentioned on the previous page, you can also navigate around MODS using the function keys located on your keyboard as well as using your mouse. MODS FUNCTION KEYS are located at the bottom of each panel. These FUNCTION KEYS are dynamic and only appear on the panel if they perform a function on that panel.

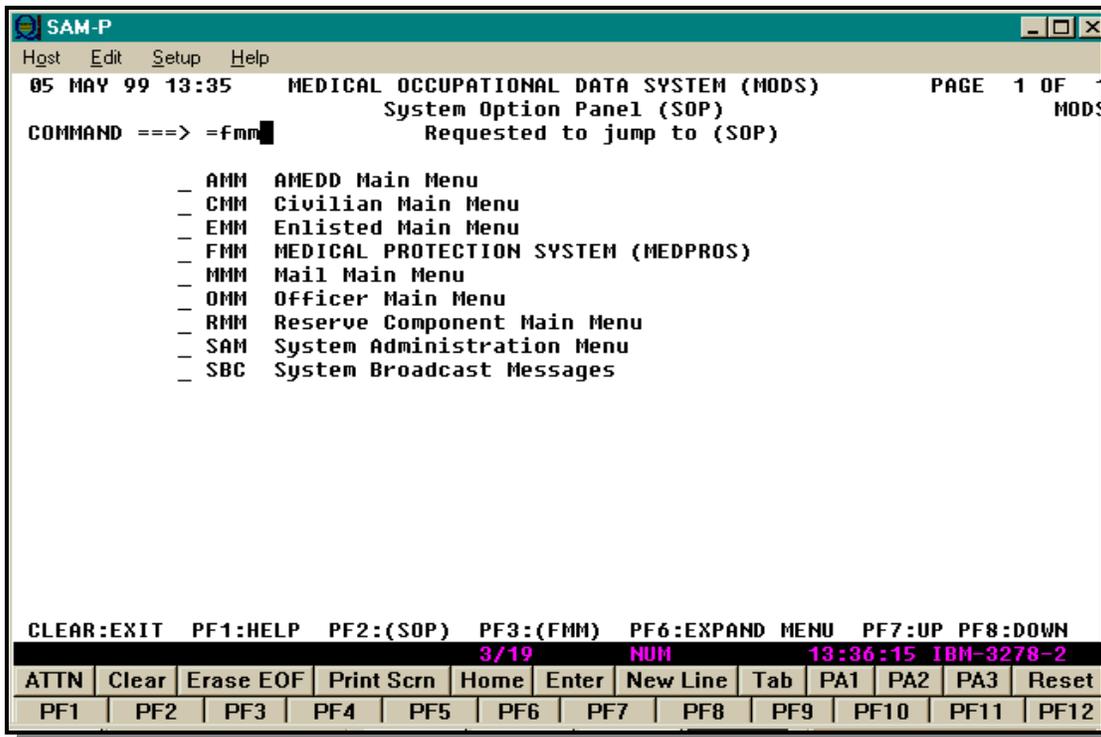

Several FUNCTION KEYS perform the same function, regardless of which panel they appear on. For example:

- ◆ PF1 is always HELP. HELP text will appear specifically for that panel.
- ◆ PF2 will always return you to the MODS System Option Panel (SOP).
- ◆ PF3 always returns you to the previous panel.
- ◆ PF4 history of previous screens viewed.
- ◆ PF5 load selected profile/units.
- ◆ PF6 load taskforce alpha roster
- ◆ PF7 is always <PAGE UP>, backing you up one page at a time.
- ◆ PF8 is always <PAGE DOWN>, advancing you forward one page at a time.
- ◆ PF9 load roster for adding/deleting individuals in the taskforce.
- ◆ PF10 is always <PAGE LEFT>, advancing you to the left one page at a time.
- ◆ PF11 is always <PAGE RIGHT> advancing you to the right one page at a time.

You can also use your mouse to click on the FUNCTION TAB located at the bottom of the QWS3270 Dialogue Screen.

**Chapter 1 – Accessing the  
Immunization Tracking  
System Main Menu  
(FRM)**

Medical Operational Data System

*MODS System Option Panel (SOP)*

The MODS MAIN MENU is called the System Option Panel (SOP). You can select MODS sub-menus by either <TABBING> to the underscore, typing “S” and pressing <ENTER> or using the quick navigational UNIQUE PANEL IDENTIFIER located at the top of each panel. Expand your menu by pressing <F6> or clicking <PF6>.

***To select the Medical Protection System (MEDPROS), simply type “=FMM” at the command prompt, then press <ENTER>.***

### *Medical Protection System (MEDPROS) (FMM)*

Medical Protection System (MEDPROS) (FMM) lists the sub-menus that are available within the MEDPROS module. To select the Immunization Tracking System Main Menu (FRM), either <TAB> to the underscore, type “S” and press <ENTER> or use the quick navigational UNIQUE PANEL IDENTIFIER by typing =FRM on the Command line, then press <ENTER>.

***To select the Immunization Tracking System Main Menu (FRM), type “=FRM” at command prompt, then press <Enter>.***

# **Chapter 2 – View Exception Reason Codes Table (FRC)**

# MEDPROS Immunization Tracking Module

*Immunization Tracking System Main Menu (FRM)*

There are seven administrative and five medical reasons someone may be either temporarily or permanently excepted from receiving one or more of the immunizations routinely required by the Department of the Army. To view these, and the duration for which they may be implemented, select the View Exception Reason Codes Table (FRC) from the FRM Menu and press the Enter key.

***TAB to the underscore to the left of View Exception Reason Code Table (FRC).  
Type an “S,” and press <Enter>.***

PF1	PF2	PF3	PF4	PF5	PF6	PF7	PF8	PF9	PF10	PF11	PF12

*View Exception Reason Codes Table (FRC)*

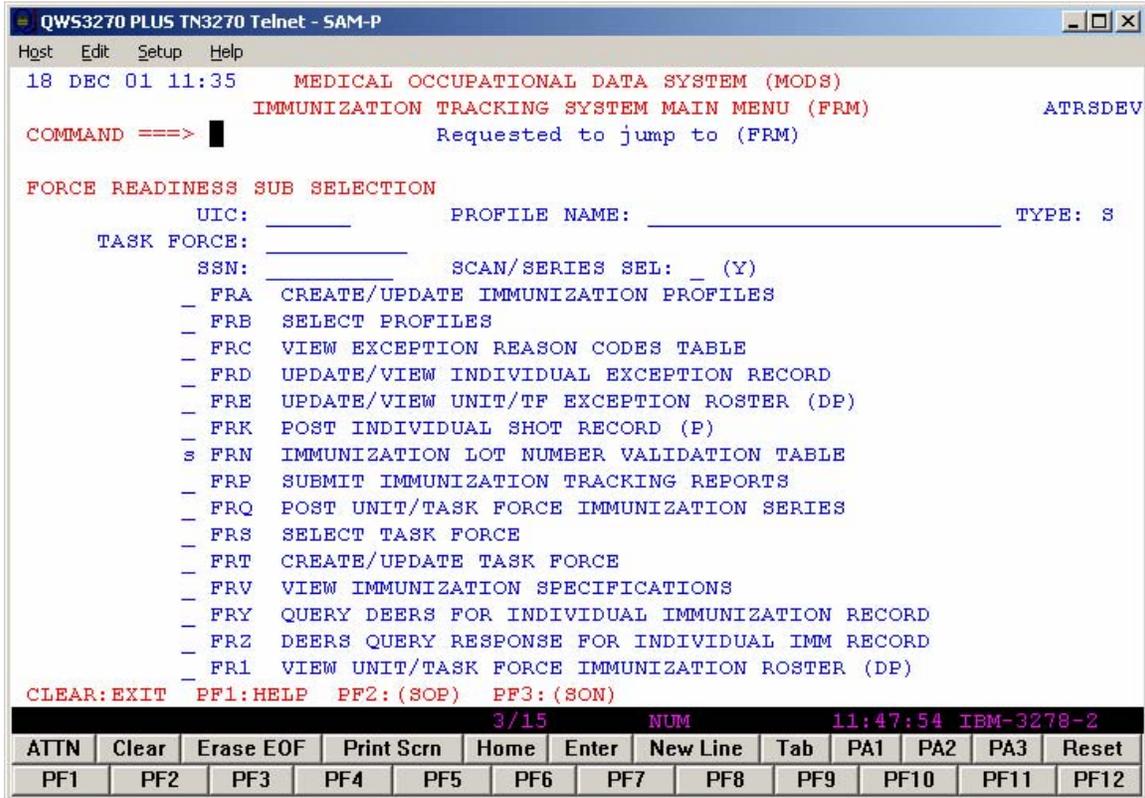

Exception reason codes starting with an “A” are administrative. Those that begin with an “M” are medical. Exceptions with “999” under the MAX Duration column are indefinite and must be manually removed by the user should the administrative or medical exception no longer apply. A brief description of each exception code is listed in the center column of the table. **For a more complete description of each exception code, press the F1 (Help) Key or see Appendix C – Exception Codes in the back of this Manual.**

Note: Accurate and timely posting of exception codes, particularly the “AP” (Admin PCS) code is imperative to a successful and accurate unit immunization program. We recommend in and out processing Standing Operation Procedures (SOPs) incorporate the screening of incoming and departing personnel to ensure they are either removed (for incoming) or added (outgoing) to the exception roster for accurate accountability. Departing personnel will continue to appear on the losing units overdue reports until they are successfully arrived at their new duty location if they are not excepted. Incoming personnel will not appear on the gaining unit’s “due immunization” rosters until they are removed from the exception roster or their exception expires (up to 90 days). Waiting for the exception to expire will most likely result in the soldier being overdue when no longer excepted.

***Press F3 to return to the FRM Menu.***

**Chapter 3 – Immunization  
Lot Number Validation  
Table  
(FRN)**

# MEDPROS Immunization Tracking Module

*Immunization Tracking System Main Menu (FRM)*

The Immunization Lot Number Validation Table lists all of the currently approved/released lot numbers for the Anthrax, Influenza, and Smallpox vaccines. Anthrax includes those manufactured by the Michigan Institute of Public Health and Bioport. Also listed on the screen are all the expiration dates of the approved/released lot numbers. The influenza page has a listing of all available lot numbers, the expiration date, and if the lot number has been expended.

***TAB to the underscore to the left of Immunization Lot Number Validation Table (FRN). Type an “S” and press <Enter>.***

***Press <F2> or click <PF2> to return to (SOP).***

# **Chapter 4 – Immunization Specifications (FRV)**

# MEDPROS Immunization Tracking Module

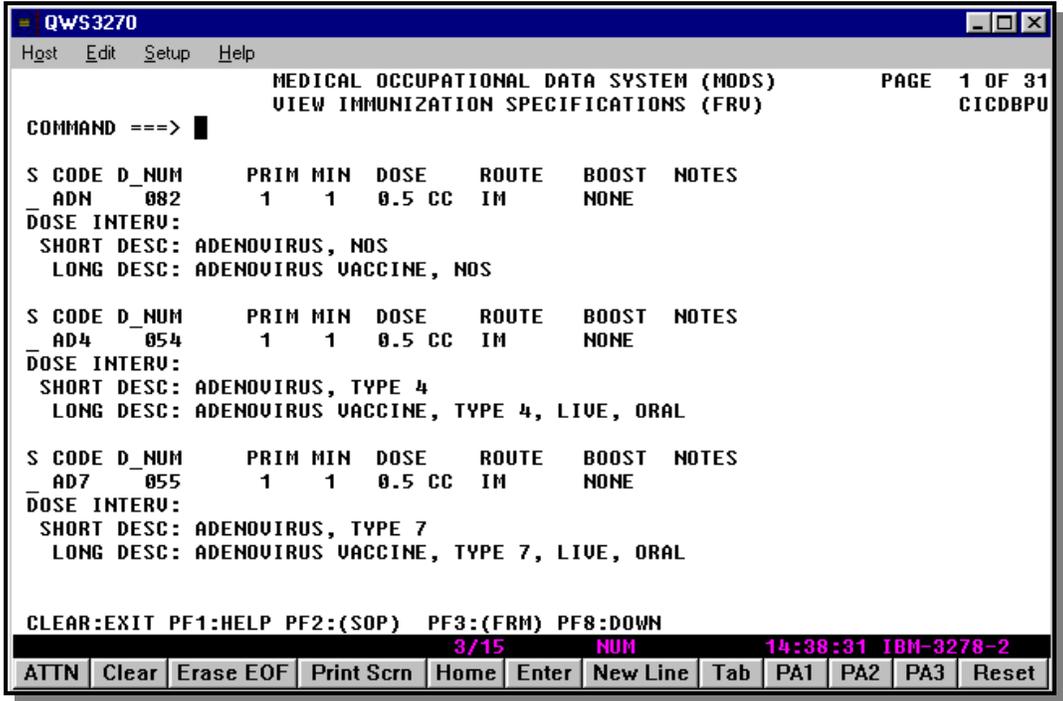

*Immunization Tracking System Main Menu (FRM)*

Immunization Specifications (FRV) is a read-only environment that allows the user to view a list of immunizations and information on the administration of the immunization, such as the number of shots in the primary series, the route, dose, boosters, etc.

**<TAB> to FRV and type “S” on the left underscore and press <ENTER>**

# MEDPROS Immunization Tracking Module

*View Immunization Specifications (FRV)*

Selecting Immunization Specifications (FRV) will allow the user to view CDC immunizations listed on MEDPROS. The immunizations are listed alphabetically by the Code column abbreviation. Press <F8> to move to the next page.

**NOTE: It is very important that the correct codes are used when posting immunizations. Many immunizations have several variations (such as Typhoid) or even pediatric variations (Hep A and B). If you are unsure of which code to use, consult with your medical authority. DO NOT GUESS!!!**

*Press <F8> to view more Immunization Specifications  
or press <F3> to return to FRM*

**Chapter 5 – Create/Update  
Immunization Profiles  
(FRA)**

## MEDPROS Immunization Tracking Module

### Immunization Profiles: System and Individual

**System Profiles** were designed to serve as a template for the immunizations required for initial entry soldiers (Basic) and those required for deployment to the sixteen regions of the world as defined by the Centers for Disease Control (CDC). Users may not modify System Profiles, but they may import them into "Individual" profiles, then add or subtract immunizations to meet the anticipated medical threat as directed by the command medical authority.

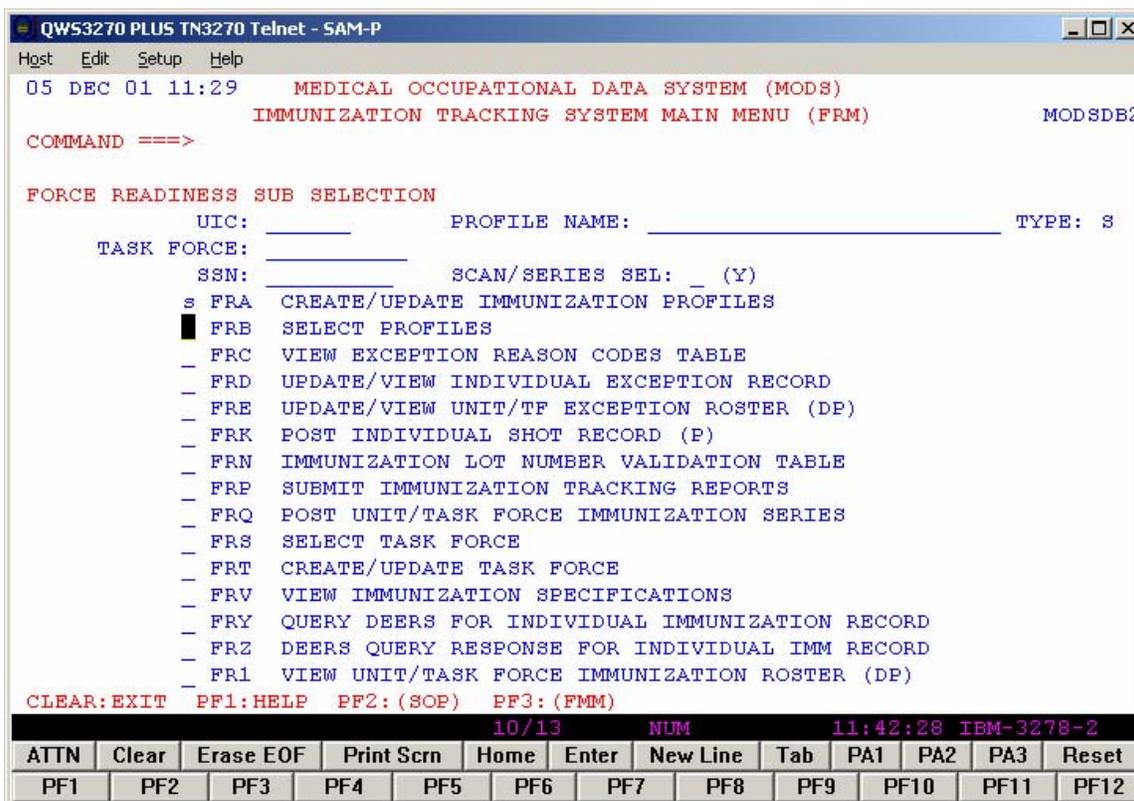

The "Basic" System Profile consists of the six immunizations given by most initial entry locations (BCT, OSUT) to new recruits which includes: Hepatitis A (HPA); Influenza, Split (INS)(when in season); Meningococcal (MEN); Measles, Mumps, and Rubella (MMR); Oral Polio Virus (OPV); and the Tetanus/Diphtheria, Adult (TDA). It also includes the Tuberculosis Test (PPD).

Each world "Region" profile INCLUDES the Basic Profile and adds those immunizations recommended by the CDC for deployment to that particular region of the world. For example, the "Middle East" profile includes the "Basic" profile immunizations, plus the Typhoid (TYM) and Anthrax (ANT) immunizations.

**NOTE: The CDC recommends Rabies vaccinations for most regions of the world, however, the Army does not routinely give this vaccine to soldiers unless they are in an "at risk" population for coming into contact with rabies (Veterinary personnel, Military Police, etc.). Japanese Encephalitis is another recommended vaccine (for some regions) not routinely given unless specifically directed by the Command Medical authority.**

Users have the capability of creating their own **Individual profiles**. They can do this by creating a name for their profile, then select one or more of the 93 immunizations listed in the system. A user may use one of the System Profiles as a starting point. They can "import" that System Profile into their Individual Profile, then modify it to meet their needs. For example, at least one OSUT location utilizes the Measles and Rubella (MRB) immunization instead of the Measles, Mumps, and Rubella (MMR) in the "Basic" System Profile. They can import the Basic System Profile into their Individual Profile, delete the MMR and add the MRB in its place; thus creating a profile that meets their specific needs.

# MEDPROS Immunization Tracking Module

*Immunization Tracking System Main Menu (FRM)*

To create a profile, enter a profile name (perhaps descriptive of its purpose), then select Create/Update Immunization Profiles (FRA) from the FRM Menu. Profile names can be whatever you want them to be, however, we recommend names that will easily be identified when you use them later for printing pre-screening rosters and checking the readiness status of your unit. Some examples follow:

- ◆ Training1 - Used for MEDPROS Training Courses
- ◆ 3-7<sup>th</sup> Inf Readiness - Used when printing a unit roster to determine who needs what immunizations to be fully deployable.
- ◆ 10 May 99 - Used to select only specific immunization(s) to be given during an SRP or for a pre-screening roster.

**<TAB> to Profile Name, type a name for your profile. <TAB> to the underscore to the left of FRA, type an "S", and press <ENTER>.**

### *Create/Update Immunization Profiles (FRA)*

These three pages (of FRA) list all CDC immunizations that you may either select from, or import a system profile from which you can add or delete immunizations to create a profile to meet your specific needs.

This chapter will teach you both methods. First, let's import an existing system profile...

### *Create/Update Immunization Profiles (FRA)*

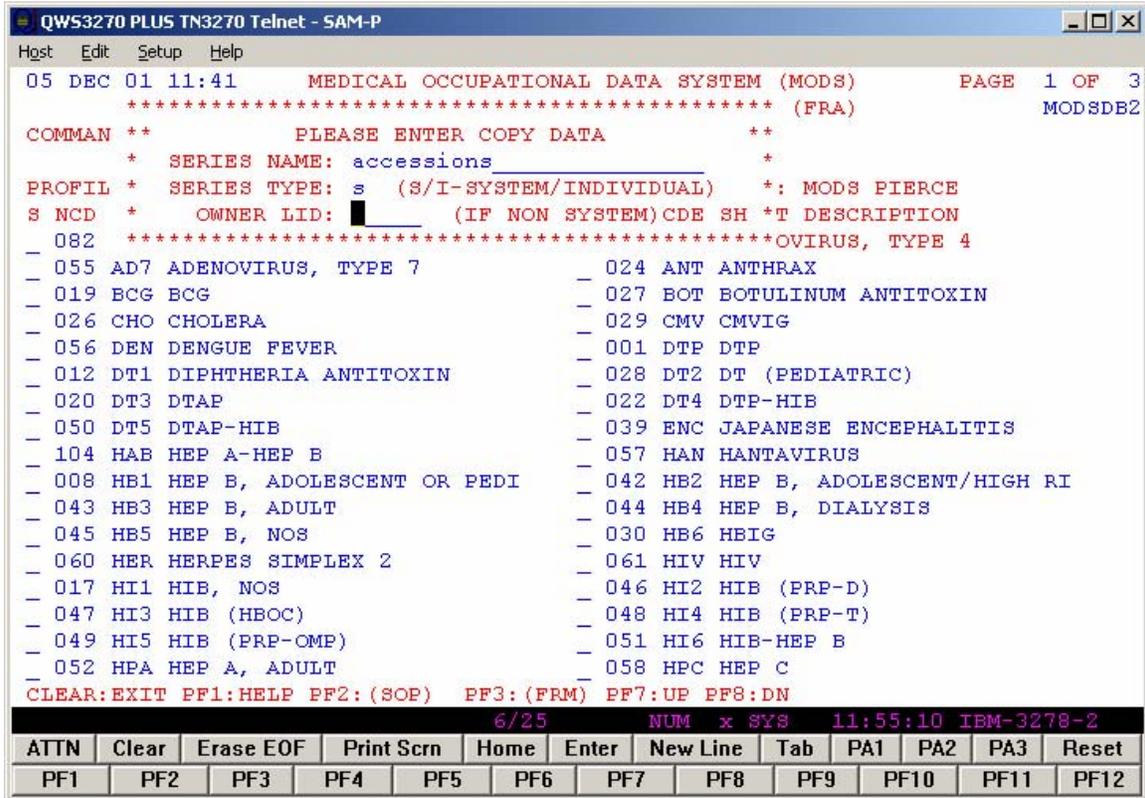

The "Accessions" system profile consists of the nine immunizations and one test currently given to all initial entry soldiers. These include Measles, Mumps, & Rubella, Oral Polio Virus, Tetanus Diphtheria, Hepatitis A, Meningococcal, Influenza, as well as the PPD (Tuberculosis Test).

System profiles also exist for the sixteen different regions of the world as defined by the Centers for Disease Control (CDC) in Atlanta, Georgia. All of these profiles include the Accessions profile, then add additional immunizations recommended for travel to the region. Users cannot modify the System Profiles, but may copy them into their individual profiles and modify them as directed by the medical authority.

To keep from having to select these individual immunizations from the complete list, you can "copy" the profile directly from the system by typing "COPY" at the Command Line and pressing the <ENTER> key.

***Type "COPY" at the Command Line and Press <ENTER>.***

# MEDPROS Immunization Tracking Module

### *Create/Update Immunization Profiles (FRA)*

A menu appears on top of the immunization listing where you may enter the name of an existing System Profile or Individual Profile to copy to the profile you are creating; thus, eliminating the need to select those immunizations individually. In our example, we are going to copy the Accessions (System) Profile into our TRAINING1 Profile, then modify it to meet our specific needs.

Tab to the SERIES NAME and type "ACCESSIONS", then <TAB> to SERIES TYPE and enter "S" (for System Profile) and press <ENTER>. If you were copying one of your Individual Profiles to this new profile, you would also need to tab to the Owner LID and type in your MODS Logon ID (i.e. SJXXX)

***Type "ACCESSIONS" in SERIES NAME, <TAB> to SERIES TYPE and type "S", then press the <ENTER> key.***

# MEDPROS Immunization Tracking Module

*Create/Update Immunization Profiles (FRA)*

When you copy a System or Individual Profile to a new profile, the immunizations that comprise that profile automatically come to the top of the listing of the 93 immunizations and are by default "selected" as noted by the "S" to their left. In this example, you can see that the seven that comprise the Basic Profile are now at the top of the list.

### *Immunization Tracking System Main Menu (FRM)*

Now that you know where to find the Exception Codes, it is time to learn how to post an exception to an individual’s immunization record. To except an individual from all immunizations, you need only enter their SSN and select Update/View Individual Exception Record (FRD) from the FRM Menu. To except an individual from one or more immunizations in an existing profile, you must enter a profile name and type their SSN, and select Update/View Individual Exception (FRD) from the FRM Menu. Use the Basic System Profile, Type S, if your unit is not targeted for deployment to one of the sixteen regions.

***TAB to the Profile Name & type “Middle East.”***  
***TAB to TYPE and type an “S.” TAB to SSN and type the individual’s SSN.***  
***TAB to the underscore to the left of Individual Exception Record (FRD)***  
***and type an “S.” Press <ENTER>***

# MEDPROS Immunization Tracking Module

*Update/View Individual Exception Record (FRD)*

To add an exception for an immunization to an individual’s record, you must type an “A” (for add) on the underscore to the left of that immunization. Enter an “Until” date in CCYYMM format (enter “999999” for permanent exemptions), and a reason (RSN) code as found on the Exception Code Table (FRC) or Appendix C – Exception Codes in the back of this Manual. In this training exercise, we are going to except this soldier from the Anthrax and Typhoid immunizations for a period of sixty days (first two full months following the month in which the exception is added). We will enter an Exception Code of “AP” for Admin PCS.

***TAB to the underscore to the left of Anthrax and type an “A”.***  
***Type “2002\*\*”(where \*\* is equal to two months past the current month) in the UNTIL column. Type “AP” in the RSN column. Move your cursor to the underscore to the left of Typhoid and enter the same information.***  
***Type a “U” on the Command Line, and press <ENTER>.***

*Immunization Tracking System Main Menu (FRM)*

You can view your unit or task force exception roster by tabbing to UIC or Task Force name and typing either the UIC or the task force name in the field. Tab down to Update/View Unit/Task Force Exception Roster (DP) (FRE).

**Note:** All menu selections followed by (DP) allow drill down and print capabilities.

***TAB to UIC and type your unit identification code.  
TAB to the underscore to the left of (FRE), type "S" and press <ENTER>.***

# MEDPROS Immunization Tracking Module

*Update/View Unit/TF Exception Roster (DP) (FRE)*

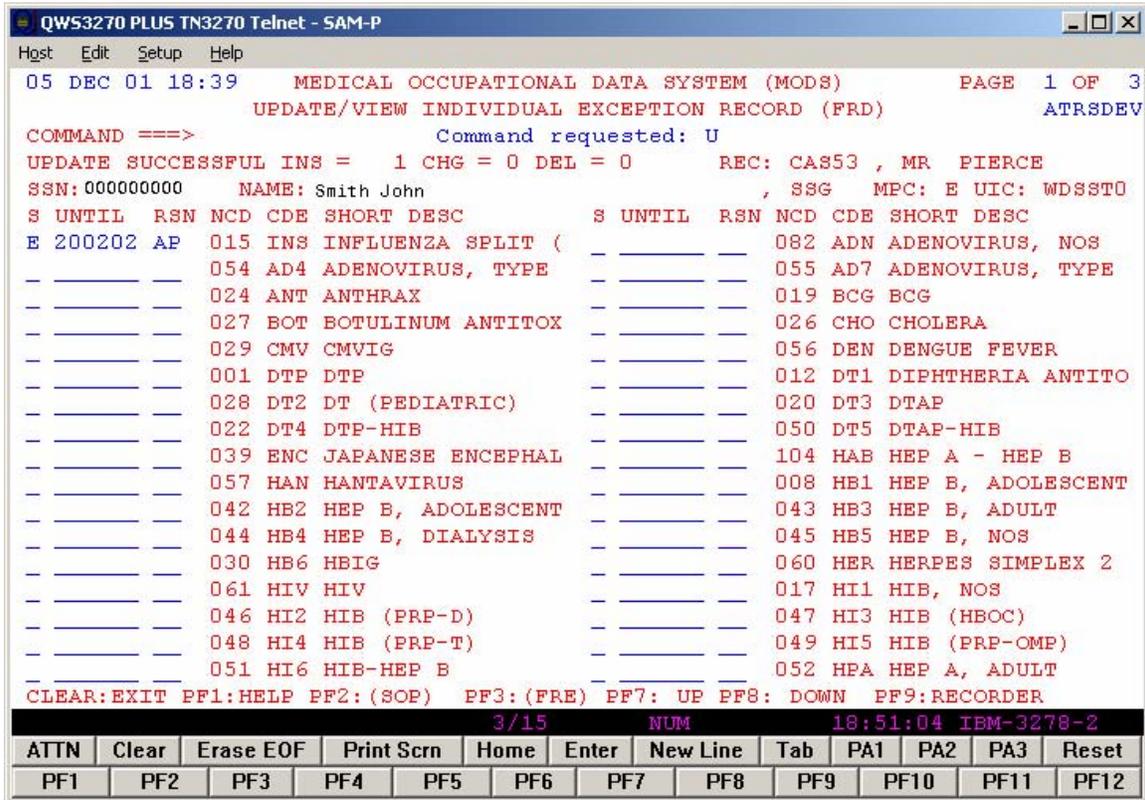

The Update/View Unit/Task Force Exception Roster (DP) (FRE) displays all soldiers assigned to the unit. If a soldier is excepted from receiving a shot, the shot will be specified under the field IMM by its three-letter identifier. The reason code will be listed under the CD field.

To view an individual’s exception record, place the cursor on the name of the soldier whose record you wish to view, and press enter.

All personnel with exceptions posted will appear at the top of the roster, this saves you from paging through roster to find individuals with exceptions.

***Use your mouse to place the cursor on the name of the individual whose exception record you would like to view. Press <ENTER>.***

# MEDPROS Immunization Tracking Module

*Update/View Individual Exception Record (FRD)*

When we placed the cursor on the individual’s name and pressed enter, we pulled up the individual exception roster for that individual. This is a list of all immunizations. We can update the exception record from this screen by placing the cursor on the underscore to the left of the immunizations, typing an “A” (for add), typing an Until date, and typing in a reason code. After all of the fields of the appropriate vaccinations have been filled in, type a “U” at the Command prompt, and press <Enter>. The immunizations that the soldier is excepted from will now appear at the top of the list with an “E” (for excepted) beside the immunization.

***Press F3 to return to the Unit Exception Roster.***

**Chapter 9 – Submit  
Immunization Tracking  
Reports  
(FRP)  
Prescreening Roster**

# MEDPROS Immunization Tracking Module

*Immunization Tracking System Main Menu (FRM)*

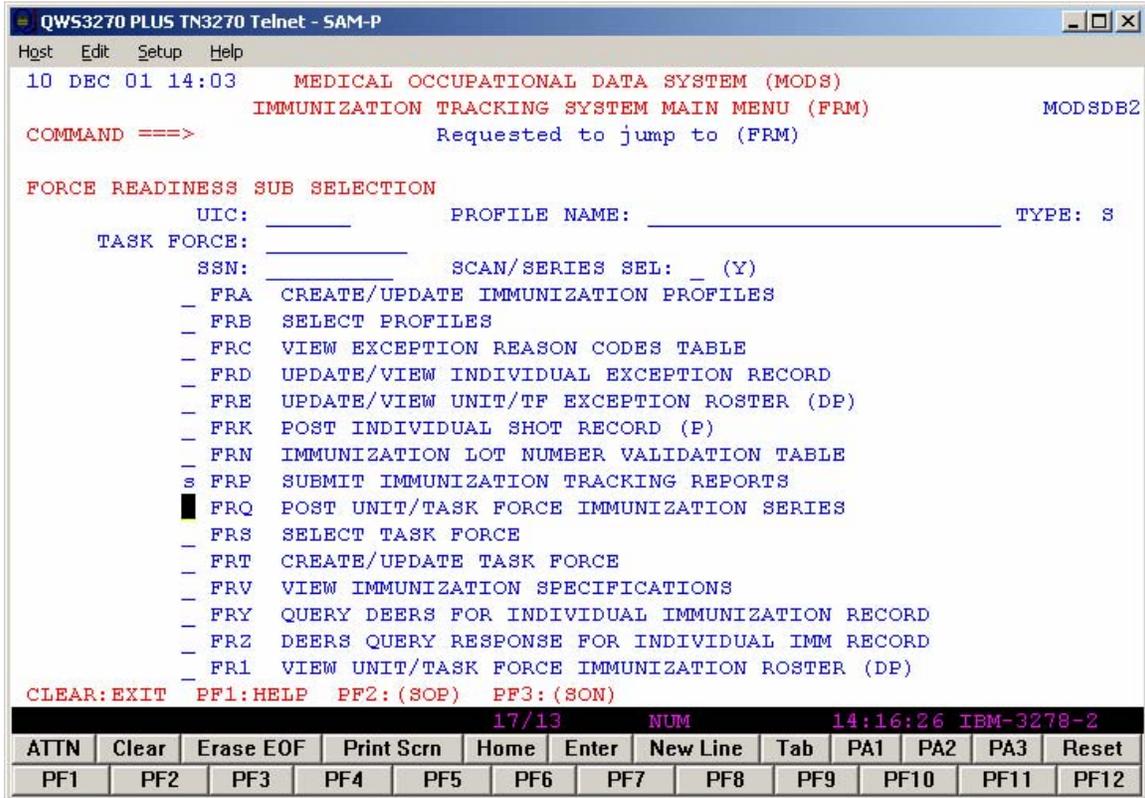

The Commander will probably deploy a shot team whose mission will be to go down range and administer immunizations to a specific unit, units, or task force. The team will come to you and request a special pre-screening roster that they can use to document the immunizations administered.

This pre-screening roster not only provides an alphabetical listing of the unit/task force members, but also allows input of other important information. This includes manufacturer, lot number, dose, route and physician's name. The roster also provides formatted pages that can be used to document biographical information on people who do not appear on the pre-screening roster. These folks can be written in and entered manually into MEDPROS.

The completed Pre-Screening Roster will be returned to you and used to document the MEDPROS on-line roster.

*Continue to the next page...*

# MEDPROS Immunization Tracking Module

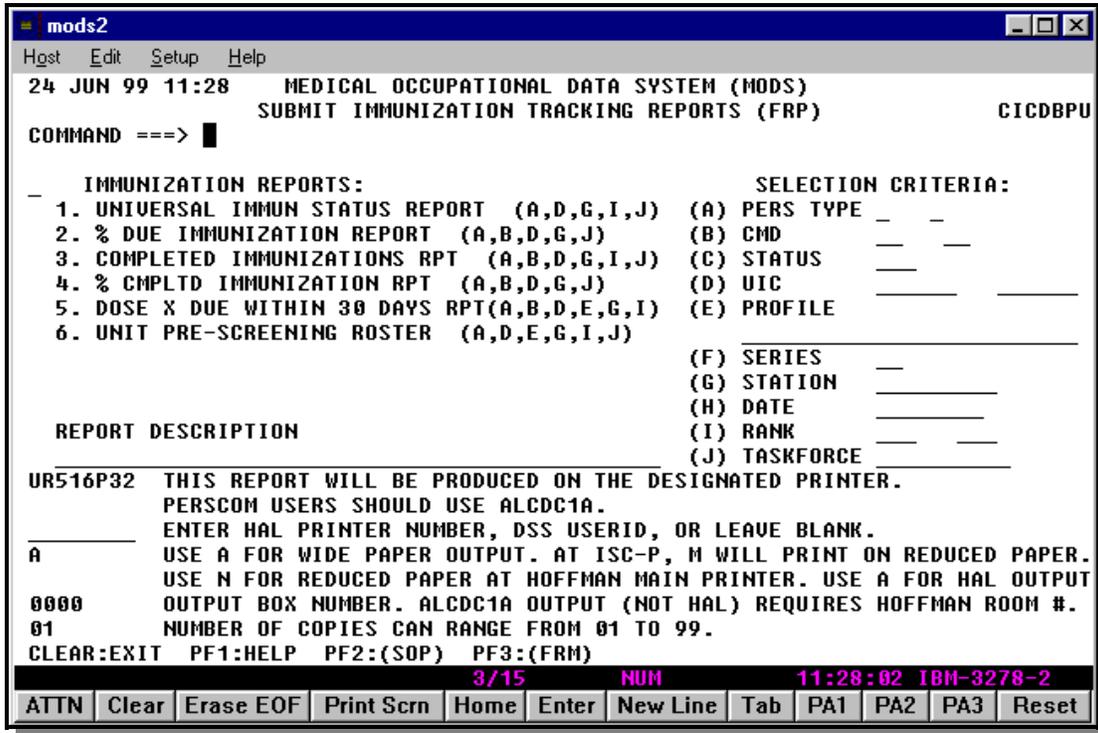

*Immunization Tracking System Main Menu (FRM)*

The IMMUNIZATION TRACKING SYSTEM MAIN MENU (FRM) lists the sub-menus that are available within the MEDPROS Medical module. We are going to generate a pre-screening roster that the shot team will use to document the administering of *ANTHRAX* immunizations to members of the *898th Engineer Battalion (Heavy)*.

*<TAB> to (FRP), type "S", then press <ENTER>.*

# MEDPROS Immunization Tracking Module

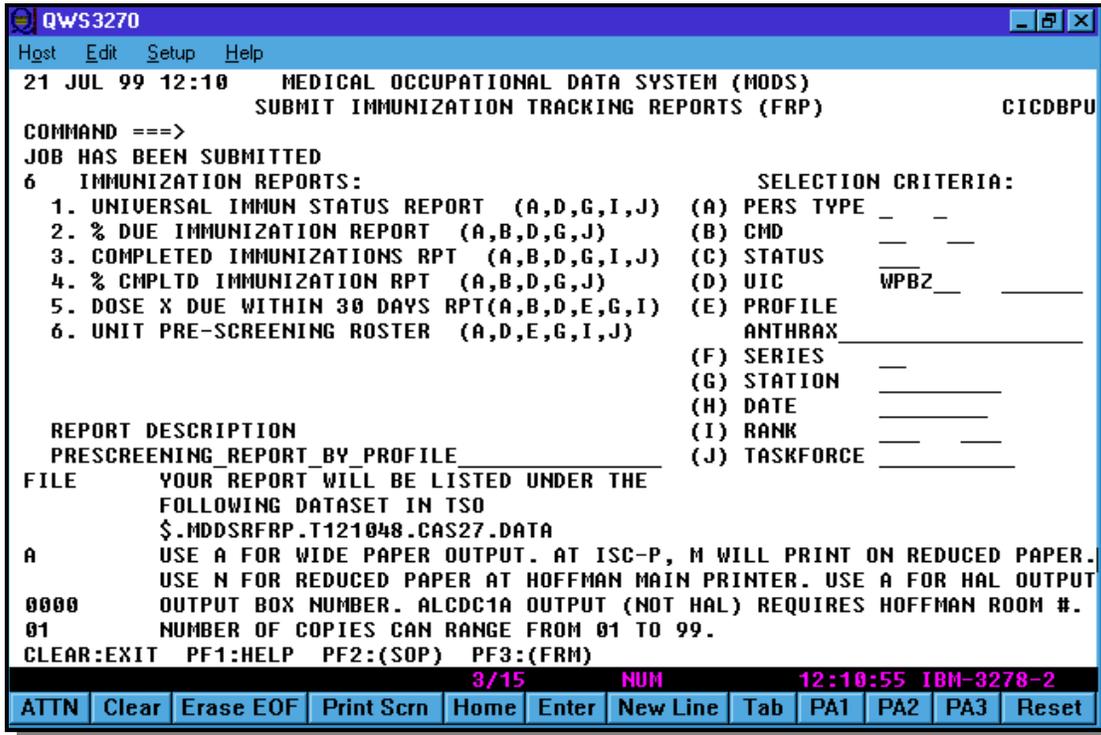

### *Immunization Tracking Reports (FRP)*

The pre-screening roster is report selection six. You can select this report by <TABBING> to the first underscore and typing “6”. Press <TAB> repeatedly until the cursor is positioned beside “(D) UIC” and type in the UIC i.e. WPBZ. <TAB> to the line below Profile. Enter the profile name to be reported. Relocate the cursor to the “Report Description” line, and type in an identifying title that will be printed at the top of each roster page.

Press <ENTER> and the job will be submitted to TSO1 for processing.

*Follow the steps above, then press <ENTER>.*

# MEDPROS Immunization Tracking Module

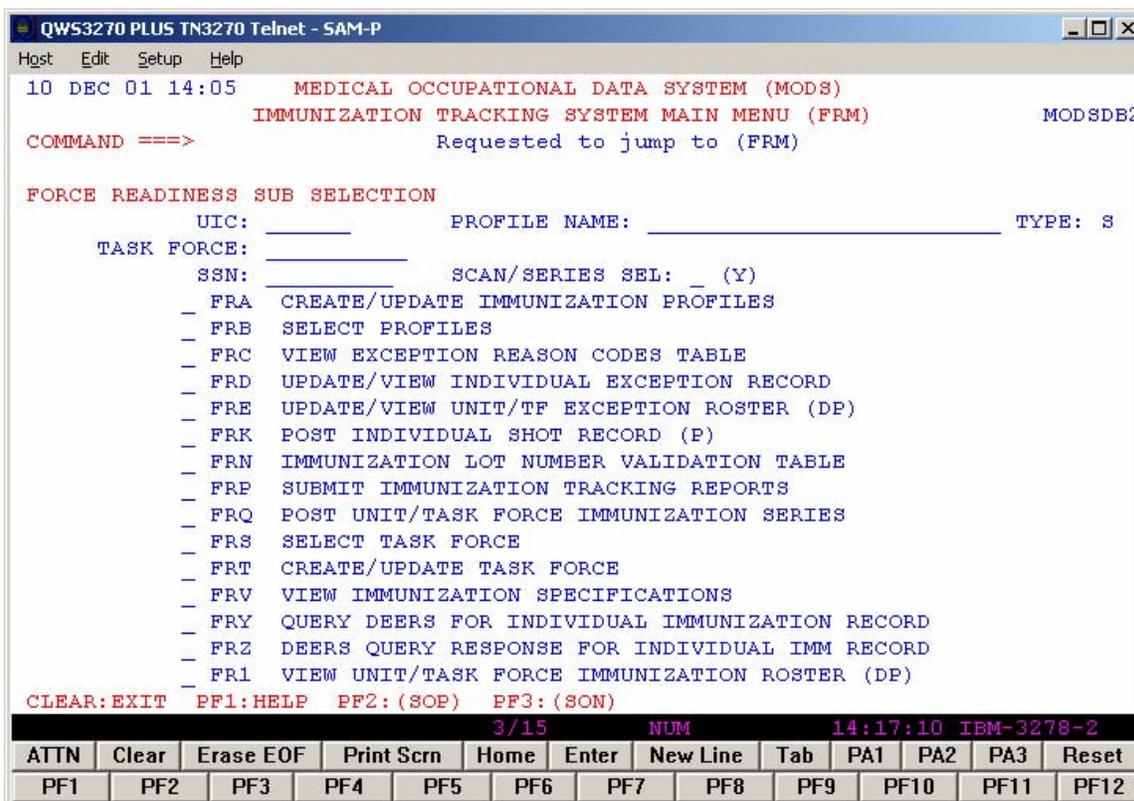

### *Immunization Tracking Reports (FRP)*

The job has been sent to TSO1 for batch processing. Once you see the message “Job Has Been Submitted”, you can return to the Force Readiness Medical Main Menu (FRM) and perform other tasks. Your print job will be processed and stored in your dataset storage area in TSO1.

***Press <F3> to return to (FRM).***

# MEDPROS Immunization Tracking Module

*Immunization Tracking System Main Menu (FRM)*

You can continue to perform other tasks within MEDPROS or MODS. Your dataset will be created and stored in your TSO1 Dataset Storage Area.

Refer to Chapter 14 in your *Supplemental Manual* for step-by-step instructions on locating and downloading your dataset. Also, there are sample reports in Appendix D – Sample Reports of this Manual.

***Make another MEDPROS selection  
or press <F2> or Click <PF2> to return to (SOP).***

**Chapter 10 – Post  
Individual Shot Record  
(FRK)**

*Immunization Tracking System Main Menu (FRM)*

The shot tech logs in to MODS and accesses the MEDPROS Medical Main Menu (FRM). In order to verify that the first shot is in fact due, the shot tech must access his MODS individual shot record. The shot tech will:

- ◆ press <TAB> to SSN and type in the social security number without dashes.
- ◆ press <TAB> to INDIVIDUAL SHOT RECORD (FRK).
- ◆ Type “S” on the left underscore, press <ENTER>.

***Follow the instructions above, then press <ENTER>.***

# MEDPROS Immunization Tracking Module

### *Post Individual Shot Record (P) (FRK)*

The individual shot record shows the entire immunization history for individuals selected. You can review the existing information or ADD an immunization if this soldier is receiving the immunization by him/herself instead of with a unit or task force.

This individual just received his influenza immunization, and it will now be documented in his individual shot record.

- ◆ Type in the new shot type code, three letter identifier (INS).
- ◆ Type an “A” on the underscore to the left, in the U column.
- ◆ CCYYMMDD: *Date the immunization was given (20021007)*
- ◆ Manufacturer: PMC (AVENTIS PASTEUR, INC)
- ◆ Lot Number: U0671EB
- ◆ ZIP/APO: 78247
- ◆ Physician’s SSN

**<TAB> to the appropriate fields, type in the information above.  
 Press F5 to load the physician’s name, dose, and route.**

*Post Individual Shot Record (P) (FRK)*

The new entry has become a permanent part of the individual shot record.

Since this is a real-time system, the added Influenza immunization can now be viewed by the soldier's Commander back at his unit or any other authorized person anywhere in the world. The information will also update all of the unit rosters and reports automatically.

**Note: To view FRL (the individuals who posted the immunizations), press your <F11> key otherwise press <F3> or Click <PF3> to return to the menu.**

# MEDPROS Immunization Tracking Module

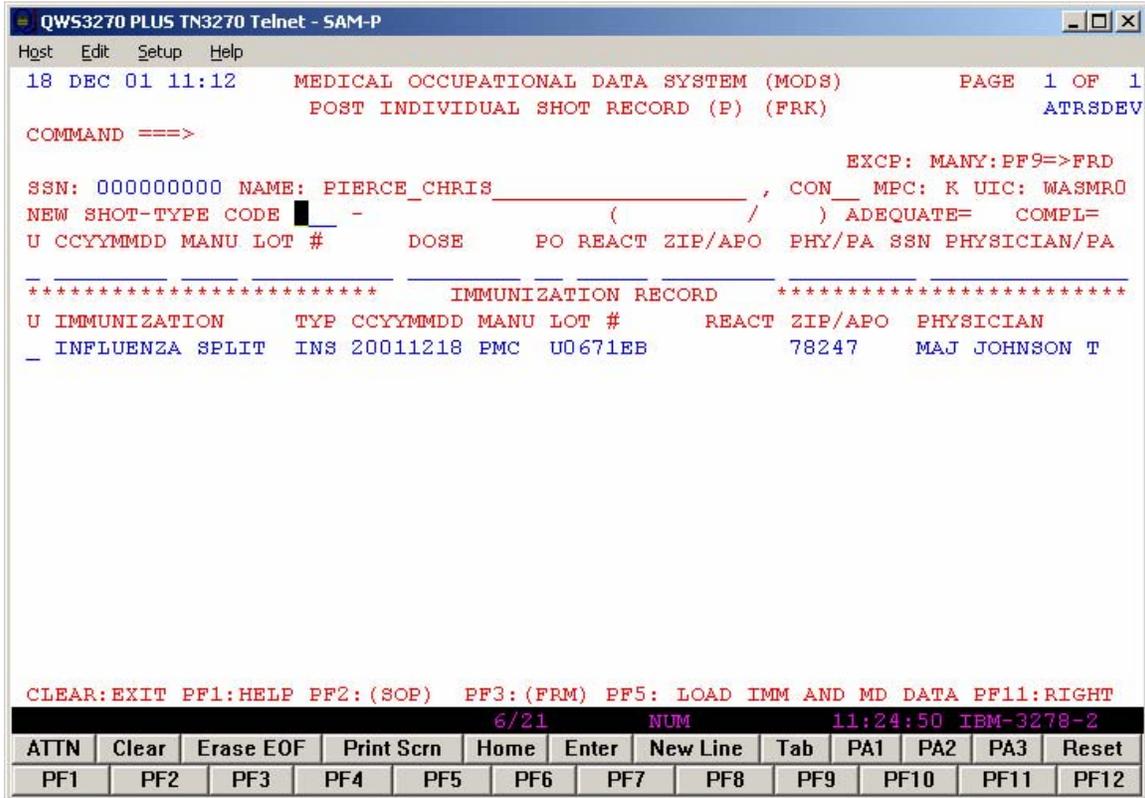

*Force Readiness Deployment Shot Record (FRL)*

Here is an example of the FRL screen. This shows this under Immunization Record, the immunizations posted and by whom. It gives the logon id, rank, and name of the individual who posted the immunization.

***Press <F3> to return to the menu.***

# MEDPROS Immunization Tracking Module

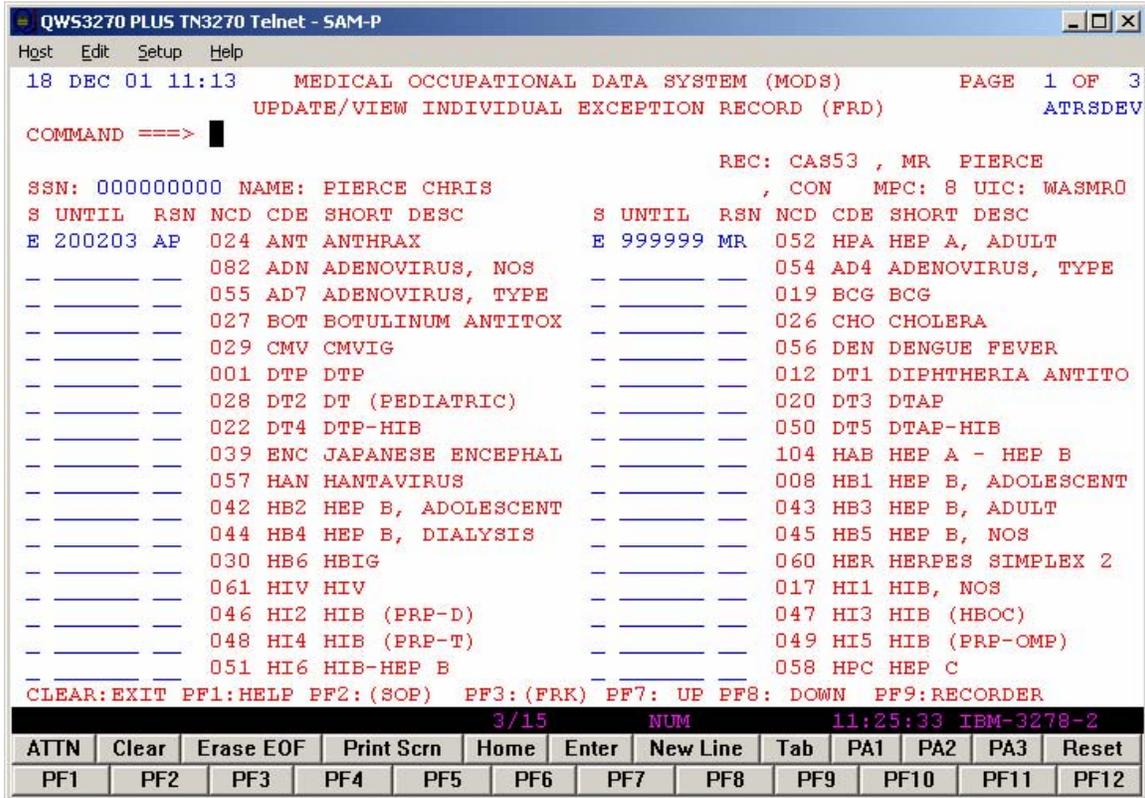

*Post Individual Shot Record (P) (FRK)*

The user will now have the ability to see if the current individual has any exceptions posted for them and have the ability to edit their individual exception record from the FRK screen. In the above example the individual's record now has the following "EXCP: MANY: F9=>FRD". To view the individual's exception record (FRD), the user needs to press <F9>.

***Press <F9> to go to the FRD screen***

# MEDPROS Immunization Tracking Module

### Update/View Individual Exception Record (FRD)

On the FRD screen, you can now edit the individual's exception record. In this example the individual had more than one exception posted to his record. If it was one exception, then you would see "EXCP: shot type (i.e. ANT), reason code, and when the exception would expire." To return to the FRK screen, just press your <F3> key.

**Press <F3> to return to the "FRK screen**

*Immunization Selection Criteria (FRR)*

This screen allows you to fill out important immunization tracking information one time and update multiple records with the stroke of a key. It is the easiest way to rapidly administer and document immunizations to a large group of soldiers. All entries made here will automatically transfer to the individual immunization record of every soldier receiving the immunization. Once this screen is filled out correctly, you will select names off of the MEDPROS pre-screening roster. All names selected will be updated with the stroke of a key.

## MEDPROS Immunization Tracking Module

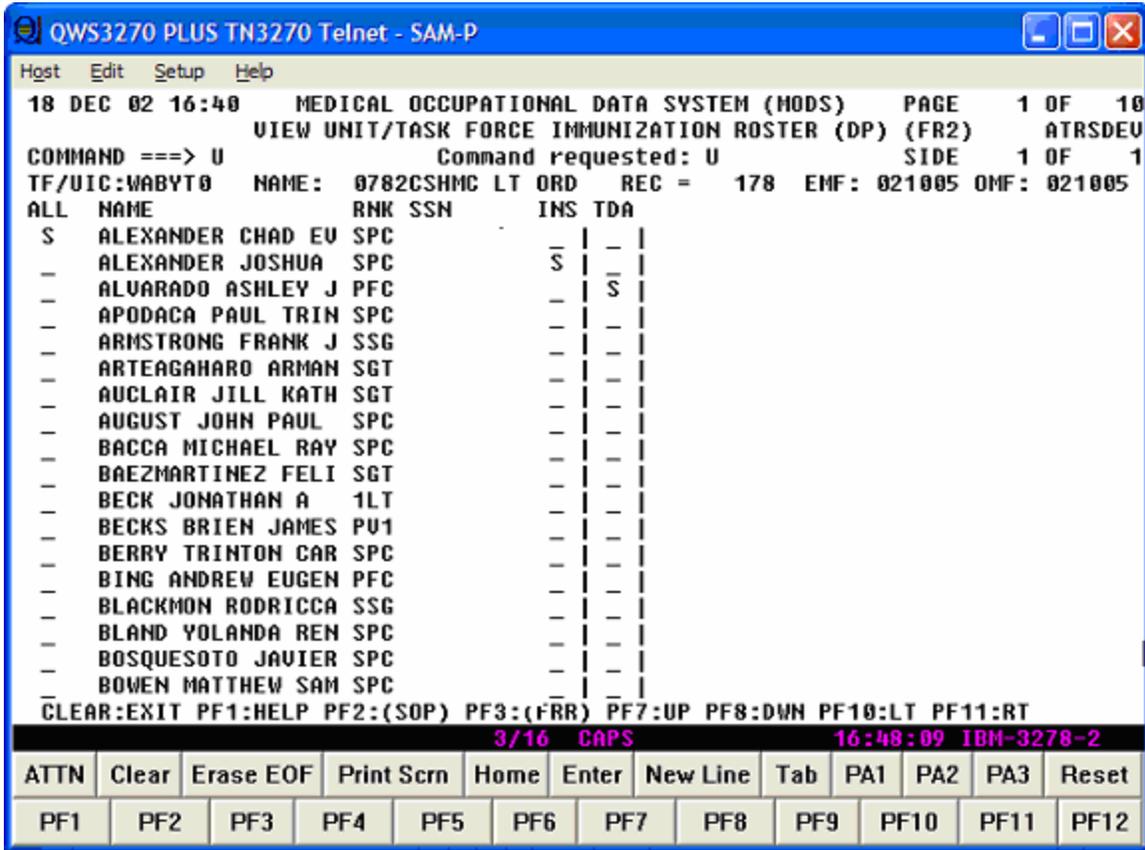

### *Immunization Selection Criteria (FRR)*

The unit is about to be immunized against **Influenza** and **TD, Adult**.

- ◆ Press <TAB> and type “S” to the left of **Influenza** and **TD, Adult**.
- ◆ Press <TAB> to move through the dose and route fields. If necessary, you can change the dose and route information.
- ◆ Press <TAB> again and type in the manufacturer code (PF1 Help & Appendix B – Immunization Manufacturer ID Codes list all of the manufacturer ID codes).
- ◆ Press <TAB> again and type in the lot number.
- ◆ <TAB> down to the SSN and type the attending Physician’s SSN.
- ◆ <TAB> down to Zip/APO, type the Zip Code/APO of the location where the immunization is being administered.
- ◆ <TAB> to the Imm Administered Date and type in the date the immunization was given (if different than default date).
- ◆ Press the <F5> key to load the Physician’s name and press <ENTER>.
- ◆ At the command line type “U” then press enter.

*Follow instructions above, press <ENTER> to load the unit immunization roster.*

# MEDPROS Immunization Tracking Module

*View Unit/Task force Immunization Roster (DP) (FR1)*

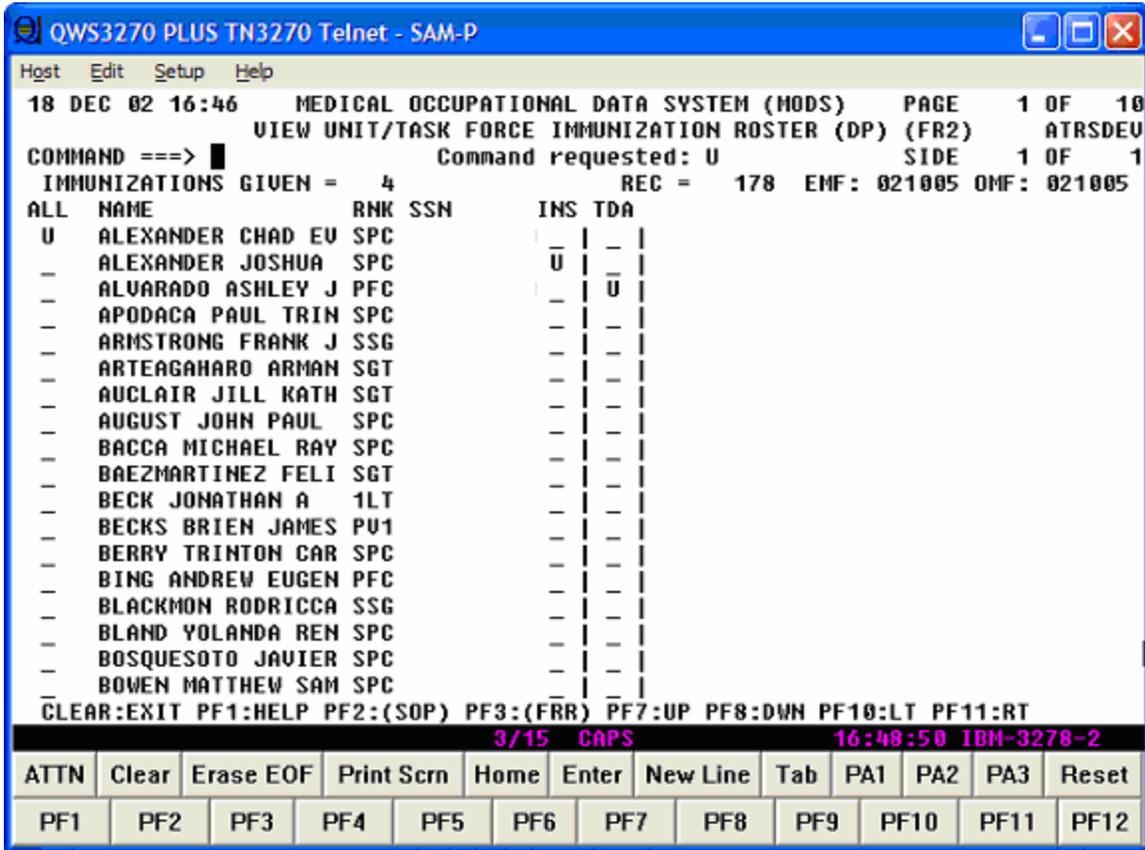

A unit alpha roster will appear. Press <TAB> until the cursor advances to the left of the first name you want to mark.

- ◆ If the individual received **all** the immunizations selected, type “S” on the underscore.
- ◆ If the individual only received some of the immunizations, <TAB> over to the individual immunization columns and type an “S” on just the immunizations the individual received.

Repeat until all of the names of those immunized on the page have been selected. At the Command Prompt, Type “U”, then press <ENTER>. Press <F8> to advance to the next page and repeat the process until every soldier immunized has been identified and marked as receiving the **Influenza** and **TD, Adult** immunizations.

*Select names or select individual immunizations. Type “U” at the Command Prompt, and press <ENTER>. Press F8 (page down) and repeat process until all records are properly updated.*

# MEDPROS Immunization Tracking Module

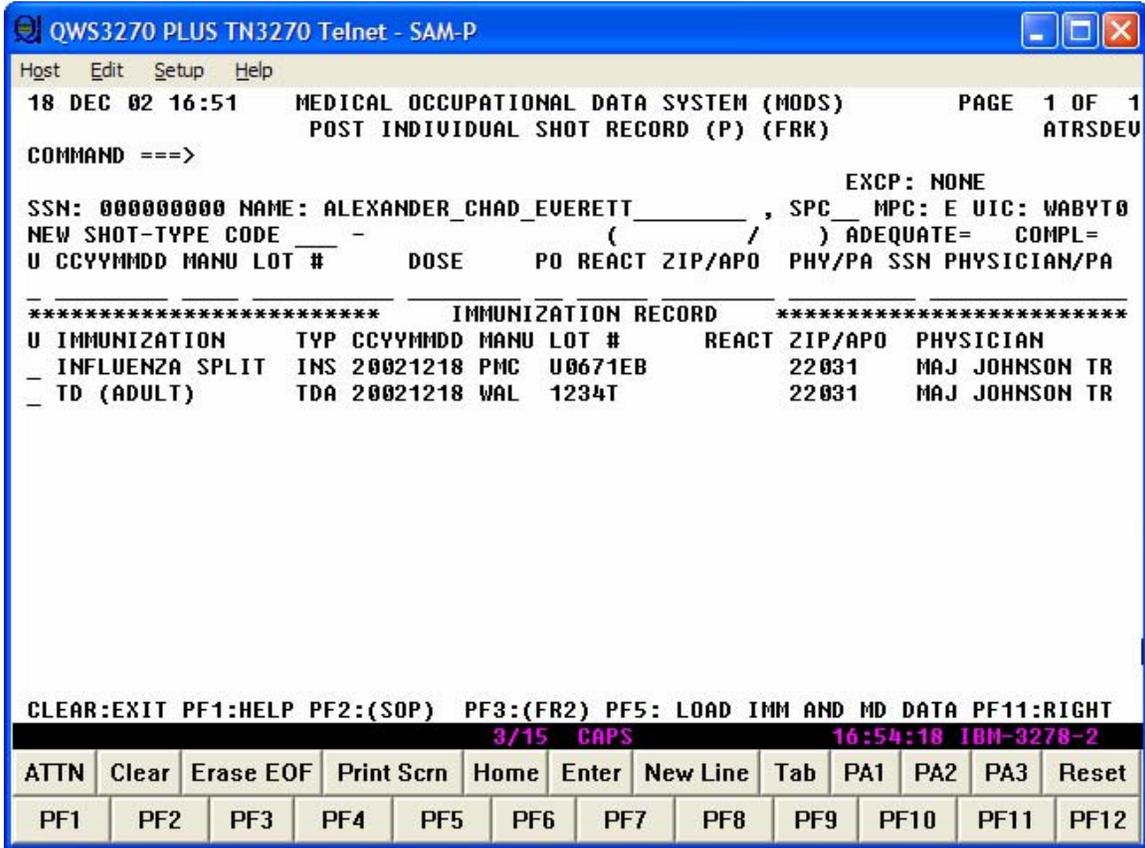

*View Unit/Task force Immunization Roster (DP) (FR1)*

Notice that the fields selected with an “S” have now become a “U” for updated. Also under the command prompt, you will receive a message telling you how many immunizations were given. To view an individual shot record, you can drill down by simply placing the cursor on the line that contains the name of the record you wish to view and press <ENTER>.

**Note: If an immunization data changes (i.e. Lot Number), press <F3> to return to FRR Selection Criteria Screen and update as needed.**

*Position the cursor on a line, then press <ENTER>.*

# MEDPROS Immunization Tracking Module

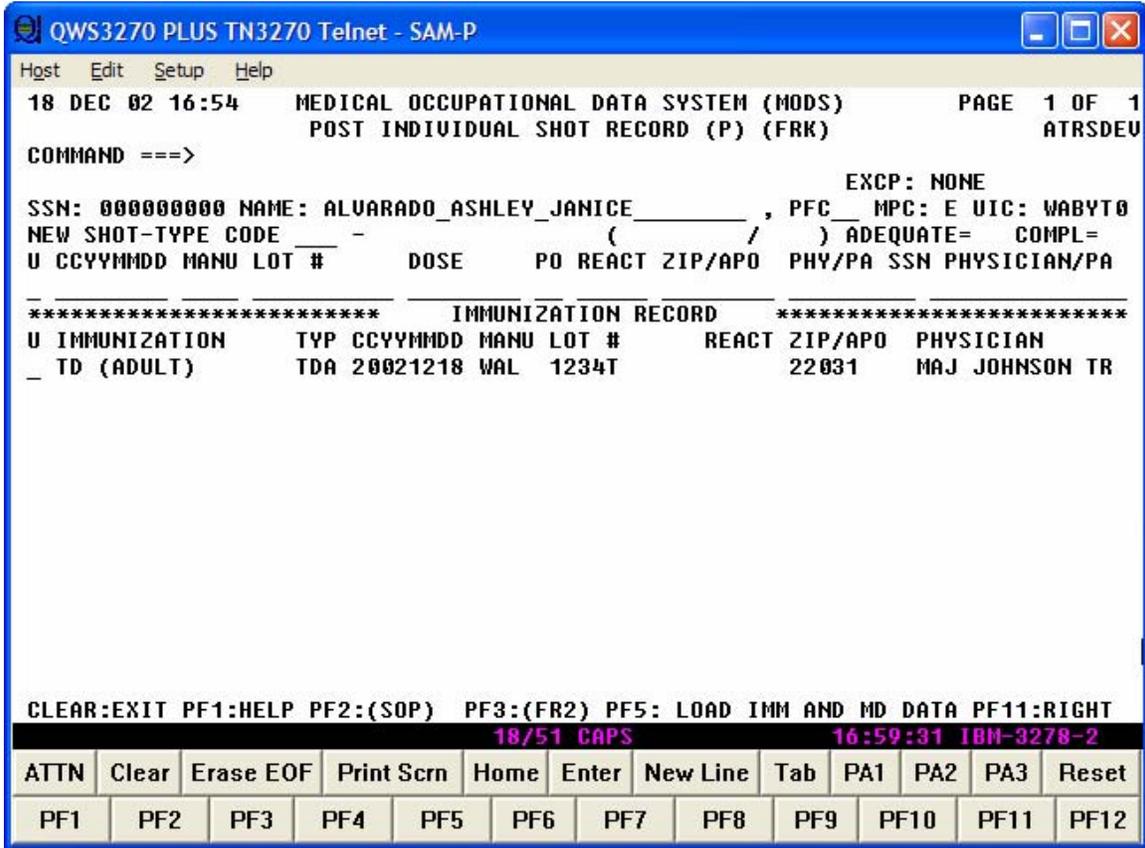

*Post Individual Shot Record (P) (FRK)*

The individual shot record displays the entire immunization history of the soldier. This record is updated real time and can be viewed by authorized personnel around the world.

To view other pages, press <F7> <Page-up> or <F8> <Page-down>.

*Continue to the next page...*

# MEDPROS Immunization Tracking Module

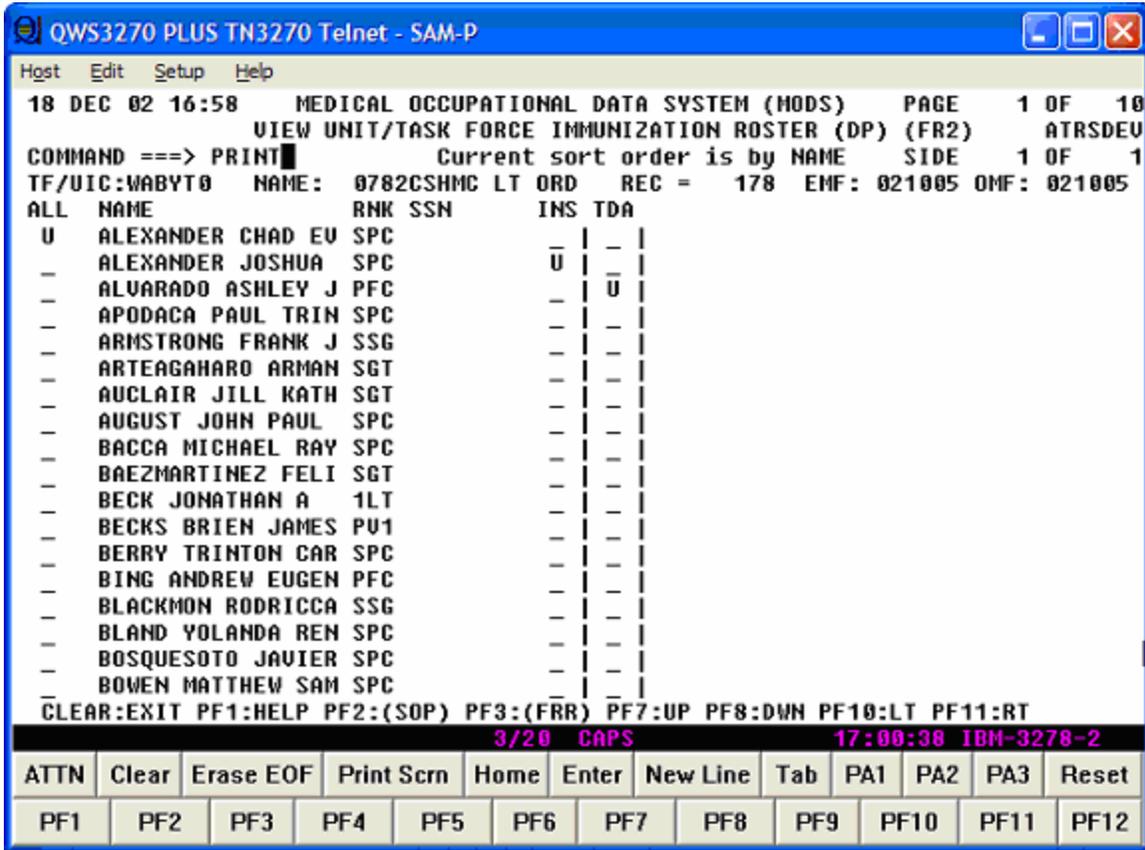

*Post Individual Shot Record (P) (FRK)*

To view another individual record, <TAB> to the SSN line and overwrite the existing SSN with a new SSN, then press <ENTER>. The new record will appear.

***Press <F3> to return to the Unit Roster.***

# MEDPROS Immunization Tracking Module

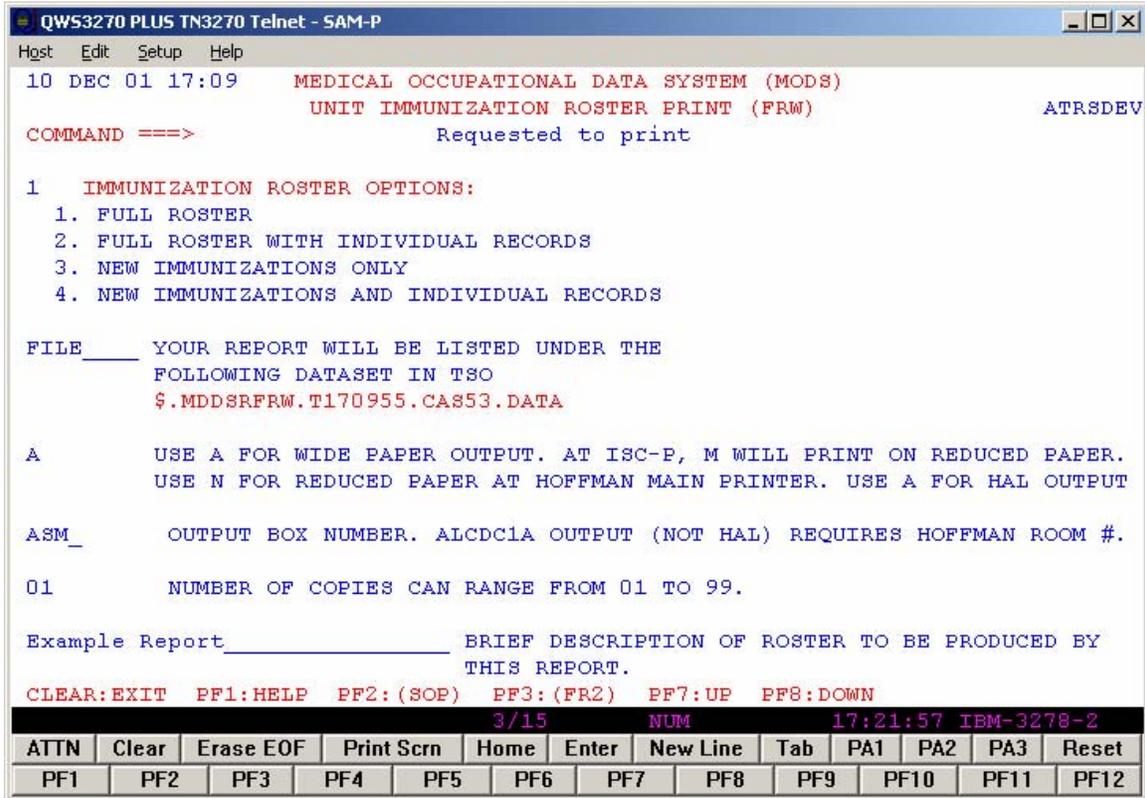

*View Unit/Task force Immunization Roster (DP) (FR1)*

You can send this roster to a dedicated printer or write it to a dataset file, download it to your local computer hard drive and print it on your local printer.

***To load MODS Printer Module, type “PRINT” at the COMMAND PROMPT, then press <ENTER>.***

# MEDPROS Immunization Tracking Module

### *Unit Immunization Roster Print (FRW)*

If you are on the DOD dedicated network i.e. MEDCOM, OTSG, PERSCOM, you can print directly to a specially configured printer. The printer ID will be listed on the first line of the left hand column.

***Press <TAB> and type 1-4, then <TAB> down to the bottom line and type in a title for this report that MODS will print at the top of each page.***

***To print, simply press <ENTER>.***

***Continue to the next page...***

# MEDPROS Immunization Tracking Module

*Immunization Tracking System Main Menu (FRM)*

To begin posting immunizations using a scanner, <TAB> to the underscore by SCAN/SERIES SEL: and type a “Y” and press Enter. This process can only be used when posting immunizations for soldiers as they are processing through the immunization line.

**<TAB> to SCAN/SERIES SEL: and type a “Y”, then press <ENTER>.**

# MEDPROS Immunization Tracking Module

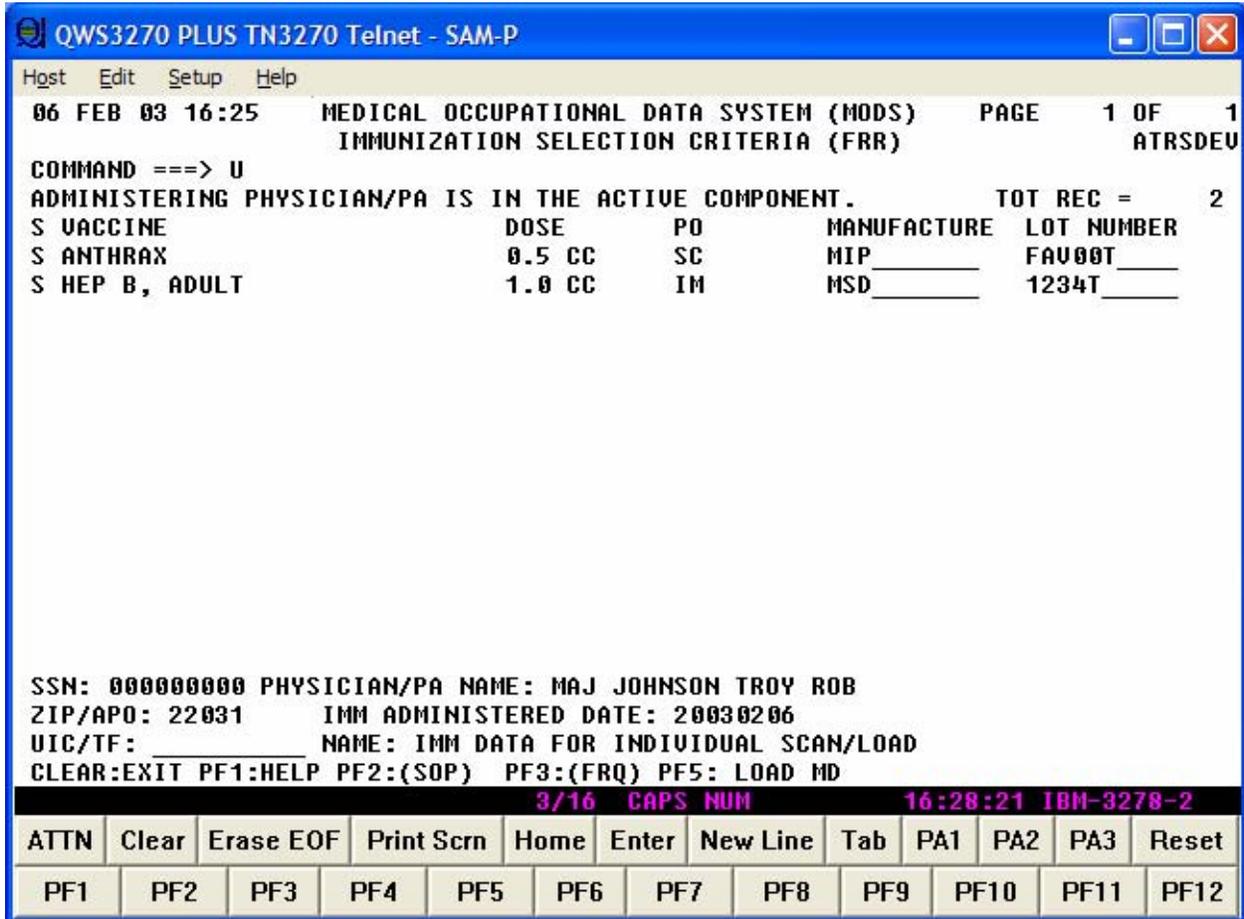

*Post Unit/Task Force Immunization Series (FRQ)*

Select the immunizations profile that we created earlier. Tab to the underscore to the left of immunization profile, type an “S” and press Enter.

**\*\*\* Please read the *DISCLAIMER* located at the top of the screen \*\*\***  
**Then press <F6> to continue.**

**<TAB> to *TRAINING2* and type “S”, then press <ENTER>”.**

# MEDPROS Immunization Tracking Module

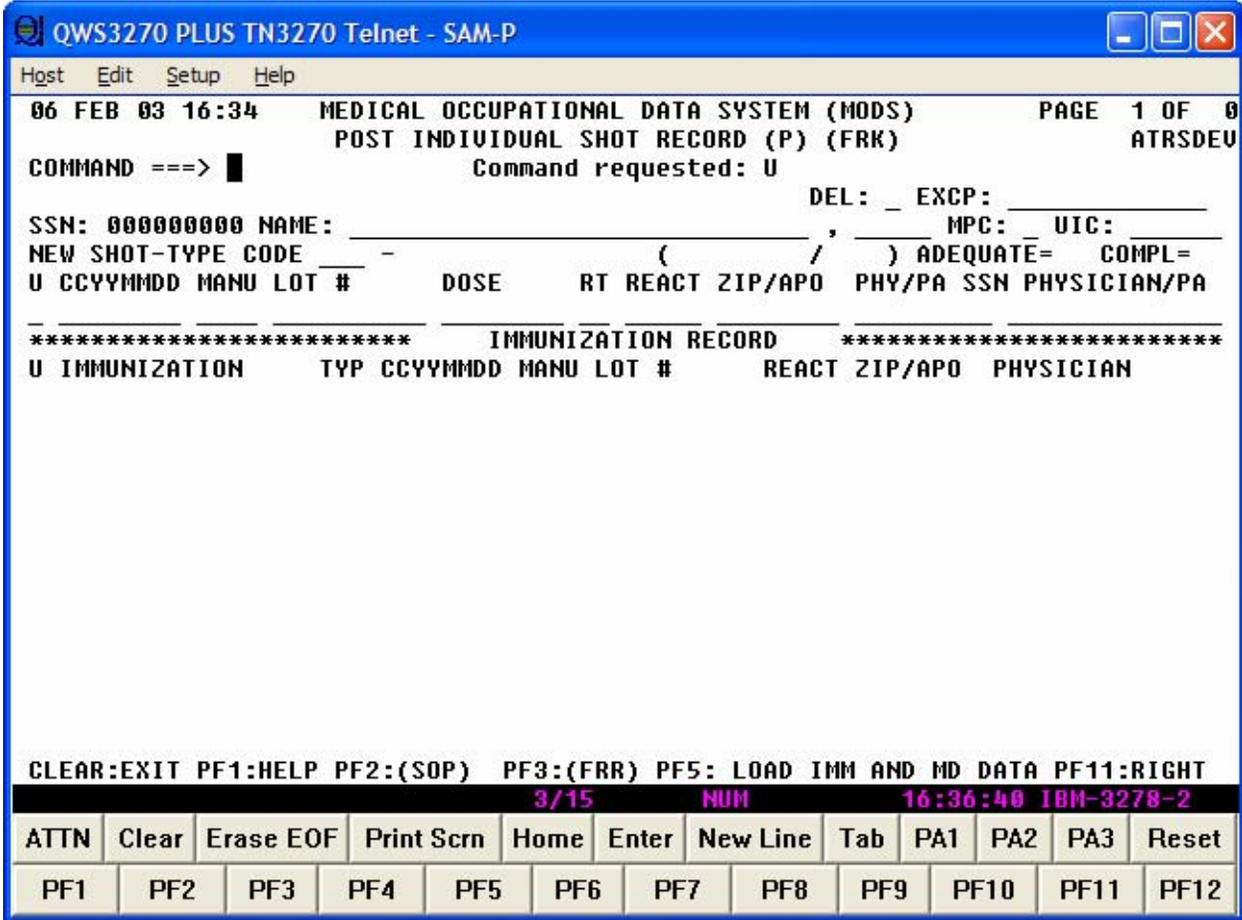

*Immunization Selection Criteria (FRR)*

- ◆ Press <TAB> and type “S” to the left of **ANTHRAX**, then **HepB, Adult**.
- ◆ Press <TAB> to move through the dose and route fields
- ◆ <TAB> and type in the manufacturer code (PF1 Help & Appendix B – Immunization Manufacturer ID Codes list all of the manufacturer ID codes).
- ◆ <TAB> and type in the lot number.
- ◆ <TAB> down to the SSN and type the attending Physician’s SSN.
- ◆ <TAB> down to Zip/APO, type the Zip Code/APO of the location where the immunization is being administered.
- ◆ <TAB> to the Imm Administered Date and type in the date the immunization was given (if different than default date).
- ◆ Press the <F5> key to load the Physician’s name and press <ENTER>.
- ◆ At the command line type “U” then press enter.

***Follow instructions above, press <ENTER> to load the unit immunization roster.***

# MEDPROS Immunization Tracking Module

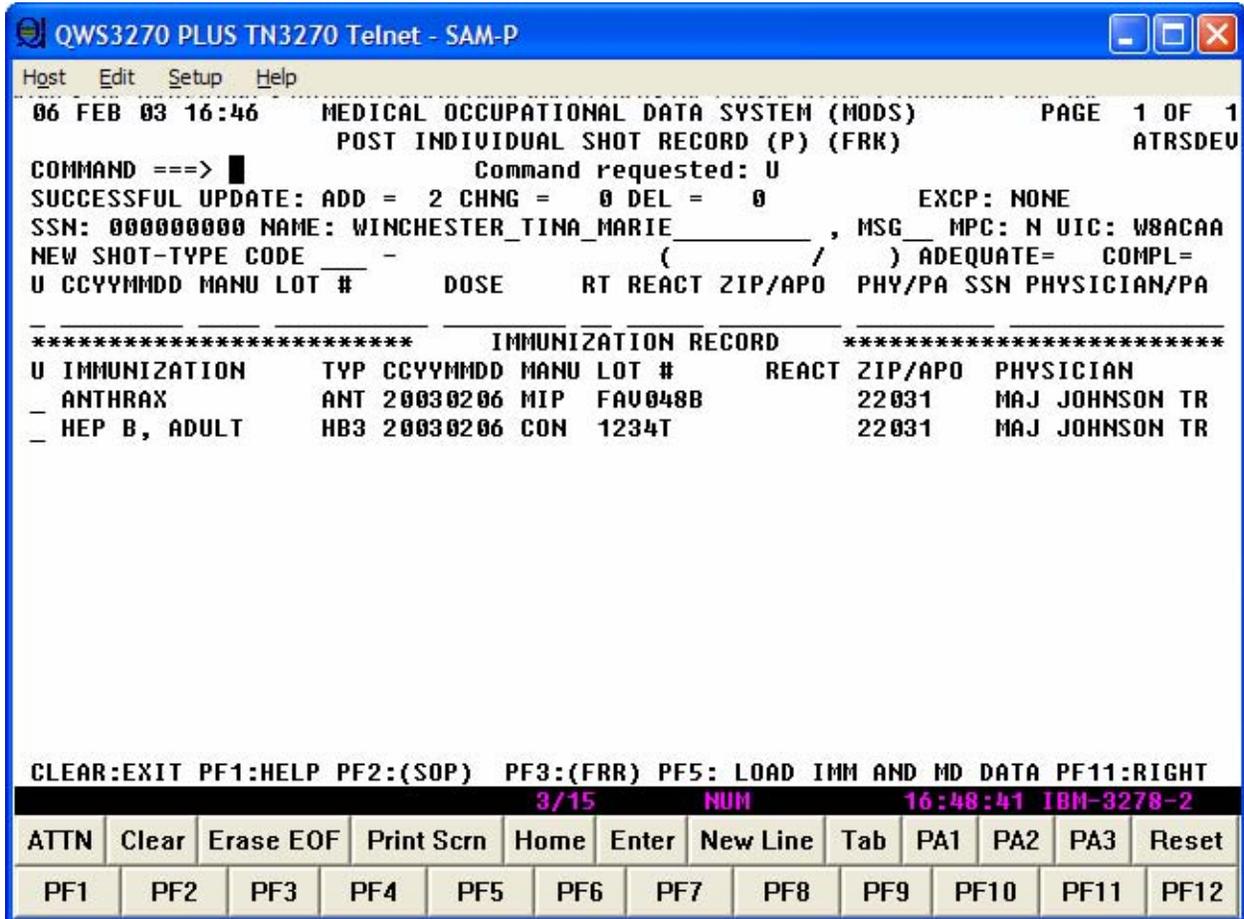

*Post Individual Shot Record (P) (FRK)*

A blank Individual Shot Record screen appears with defaults of “000000000” for the SSN.

Scan the **TOP** barcode on the back of the soldier’s Identification (ID) Card (DD Form 2). The program translates the data scanned, converts it to the soldier’s SSN, and posts it in the SSN field on the screen.

***Scan the TOP barcode on the back of the soldier’s ID Card.***

# MEDPROS Immunization Tracking Module

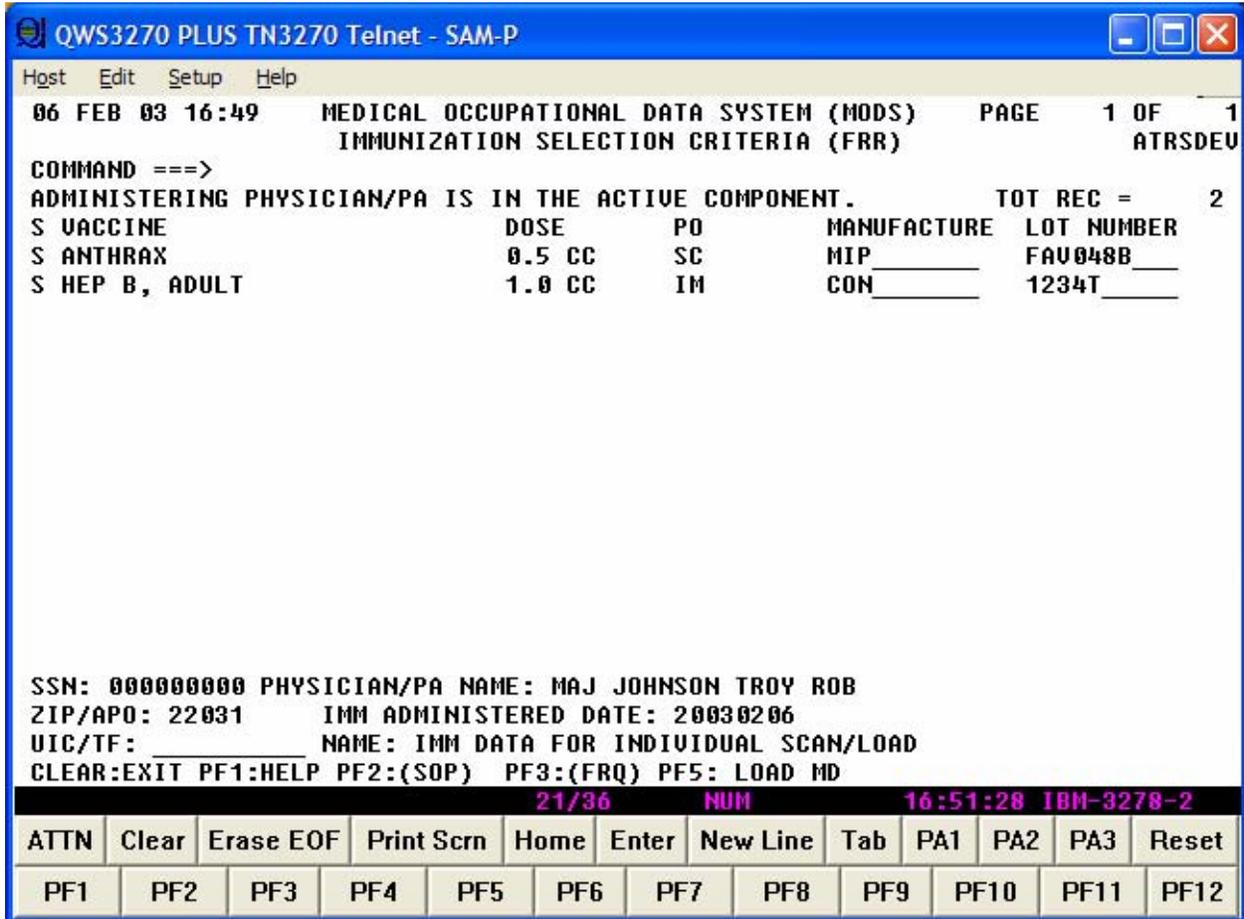

*Post Individual Shot Record (P) (FRK)*

Once the personal data is verified, **type a “U” at the command line, and press <ENTER>**. This updates the individual’s immunization data and returns the cursor to the Command line for scanning the next ID Card. The data entry person then starts the procedure again, by scanning the next card to post the next individual’s record.

\*Air Force, Navy, Marines, Contractors, and Civilians (other than DOD civilians assigned to U.S. Army Medical Command) must first be entered into a Task Force before the system will post their name, rank, and UIC when utilizing the scanner. See Chapter 13 – Create /Update a Task Force (FRT) for directions on how to create a task force.

***Press F3 to return to the Immunization Selection Criteria Screen (FRR).***

# MEDPROS Immunization Tracking Module

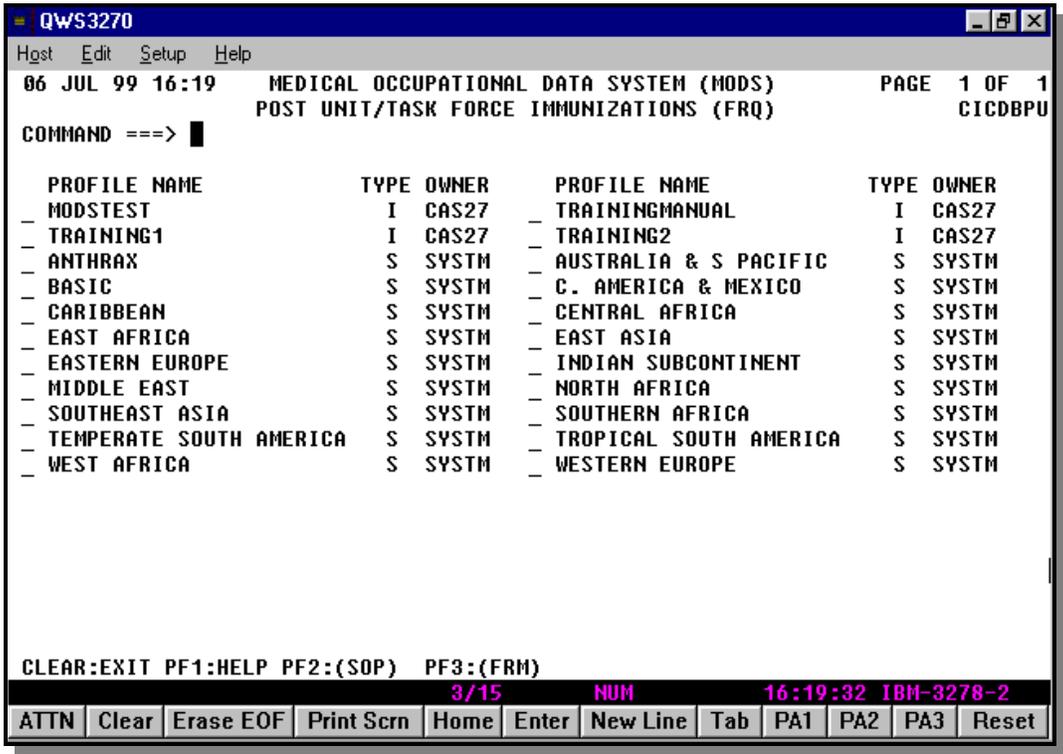

*Immunization Selection Criteria (FRR)*

Return to the Immunization Tracking System Main Menu by paging back through the screens.

***Press <F3> to return to the Immunization Series Selection Screen (FRQ).***

# MEDPROS Immunization Tracking Module

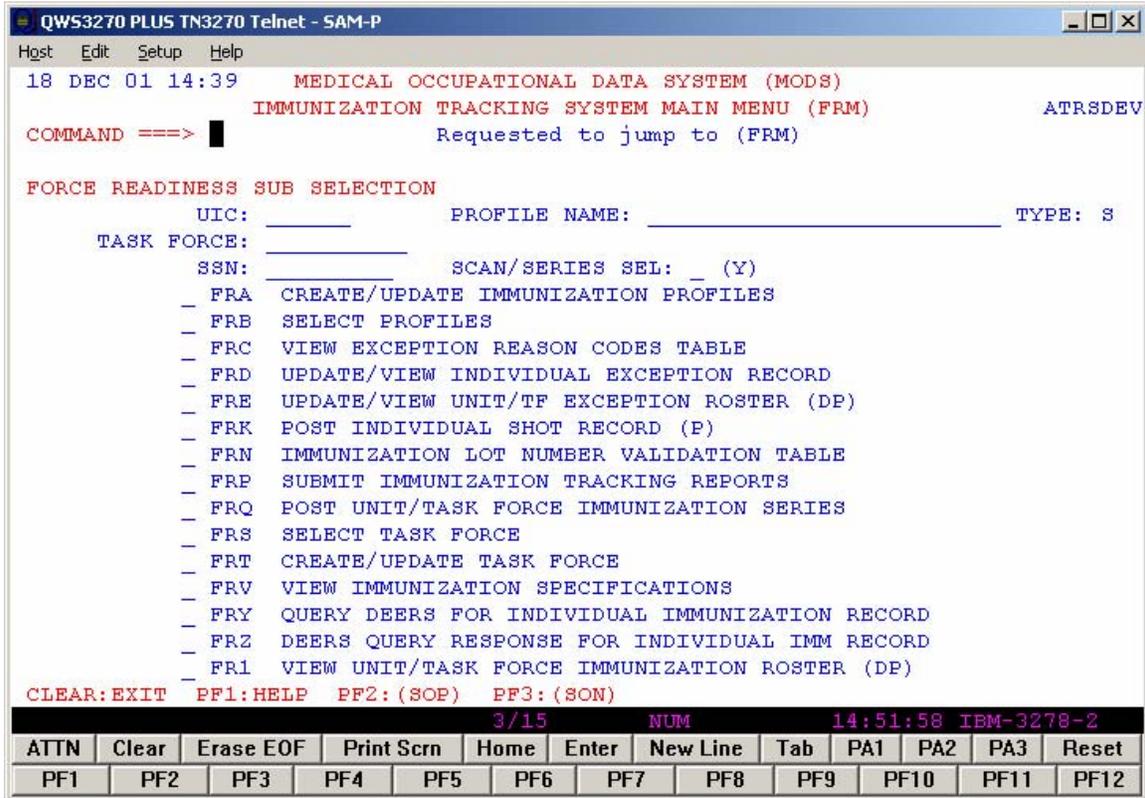

*Post Unit/Task Force Immunizations (FRQ)*

Return to the Immunization Tracking System Main Menu by paging back through the screens.

***Press <F3> to return to the Force Readiness Medical Main Menu (FRM).***

# MEDPROS Immunization Tracking Module

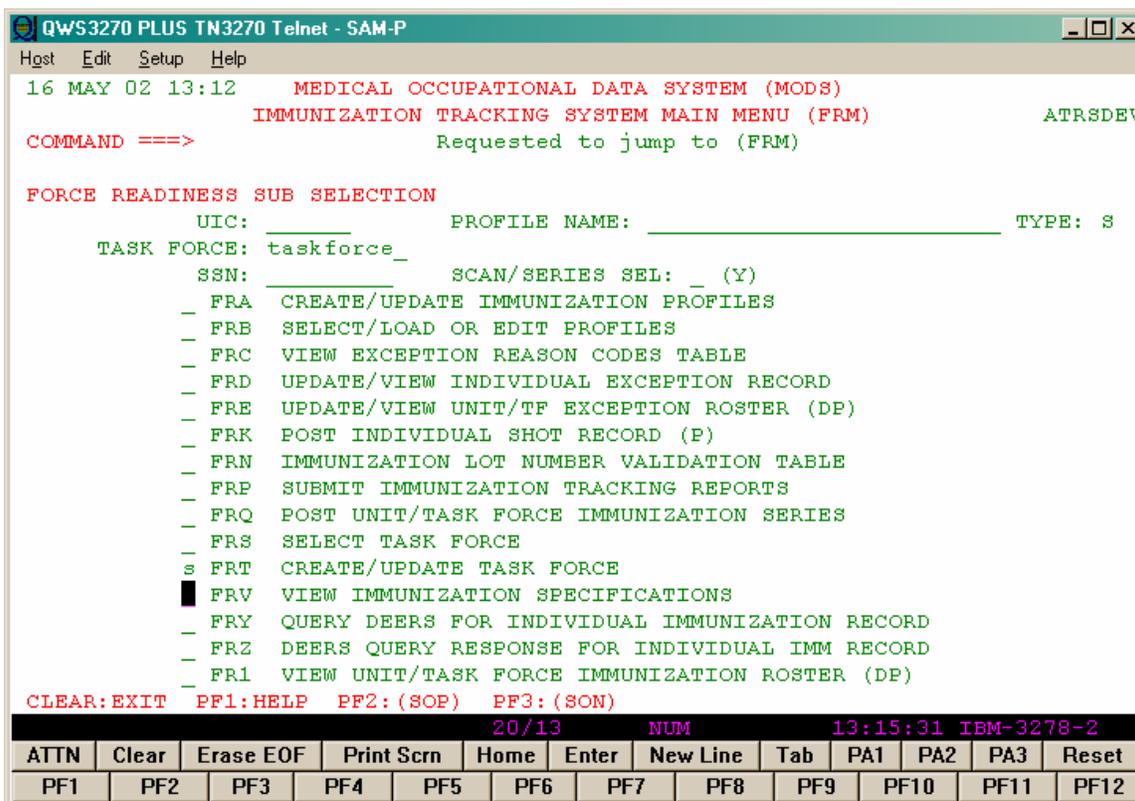

*Immunization Tracking System Main Menu (FRM)*

You can either select another menu option or return to MODS System Option Panel (SOP).

***Press <F2> to return (SOP).***

**Chapter 13 – Create  
/Update a Task Force  
(FRT)**

# MEDPROS Immunization Tracking Module

*Immunization Tracking System Main Menu (FRM)*

Special mission operations may require that several units deploy together as one task force instead of individually.

You can easily create a task force by entering the UIC of each unit that will be combined together as the deploying task force.

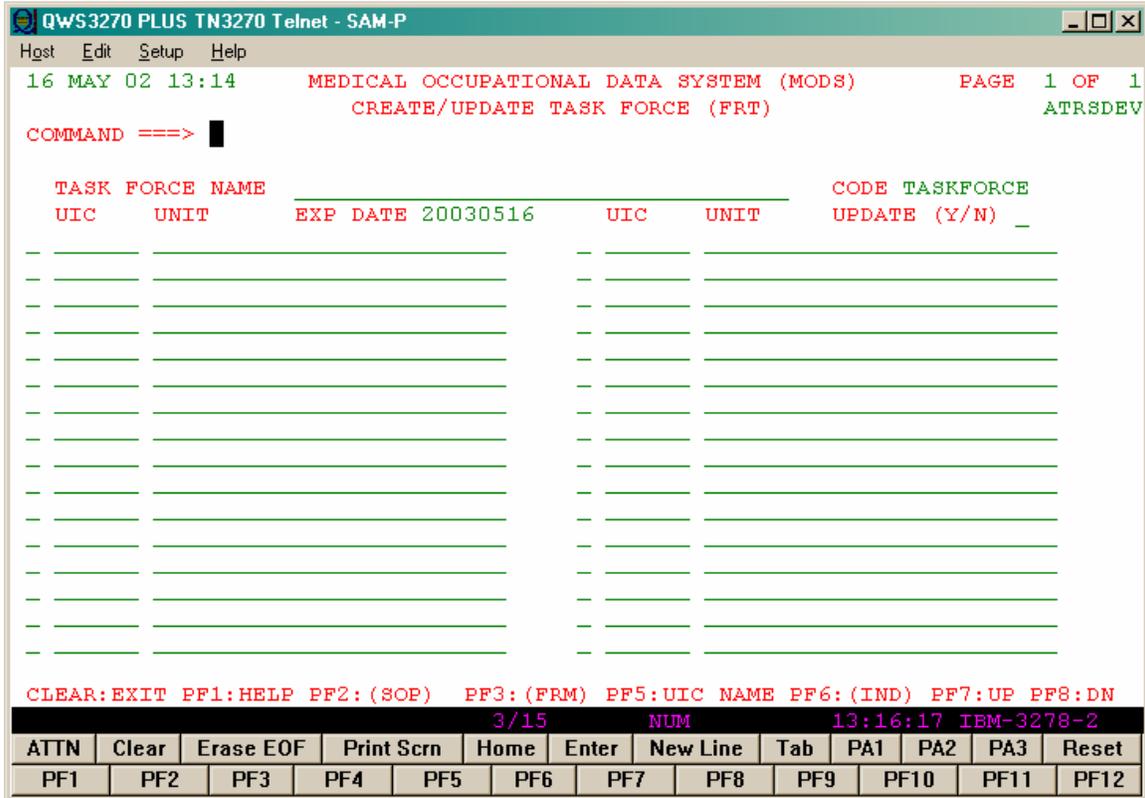

AOC/MOS shortages can be added to the task force by entering individual social security numbers.

<TAB> to “TASK FORCE” and type in a TASK FORCE Identification Code (short name). This code will be used later to recall the task force just as you would use a UIC to recall a unit.

Then <TAB> to “FRT” and type “S” to select “CREATE/UPDATE TASK FORCE.

**<TAB> to “TASK FORCE”, type in TF Code, then  
<TAB> to FRT, type “S”, then press <ENTER>.**

# MEDPROS Immunization Tracking Module

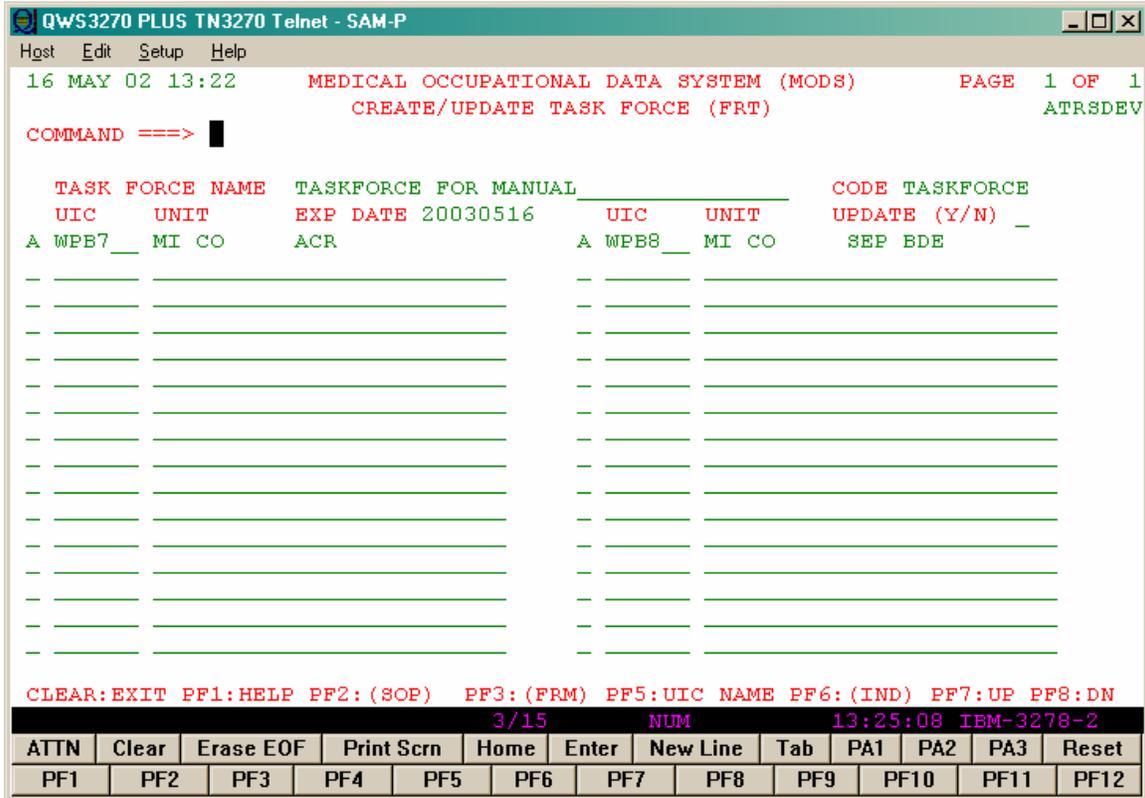

### *Create/Update Task Force (FRT)*

- ◆ <TAB> to “TASK FORCE NAME”, type in the full name of the task force you are about to build.
- ◆ <TAB> to the EXP DATE, type in the date the taskforce will no longer be needed (default is one year from the day created.)
- ◆ <TAB> to UPDATE field, type in either a “Y” (selecting this will reload the taskforce when the main files are reloaded) or “N” (this will disable the reloading of this taskforce, all changes will need to be done manually by the owner of the taskforce). If field is left blank, default is “Y”.
- ◆ <TAB> to the first underscore, type the letter “A” for ADD.

*Continue to next page...*

# MEDPROS Immunization Tracking Module

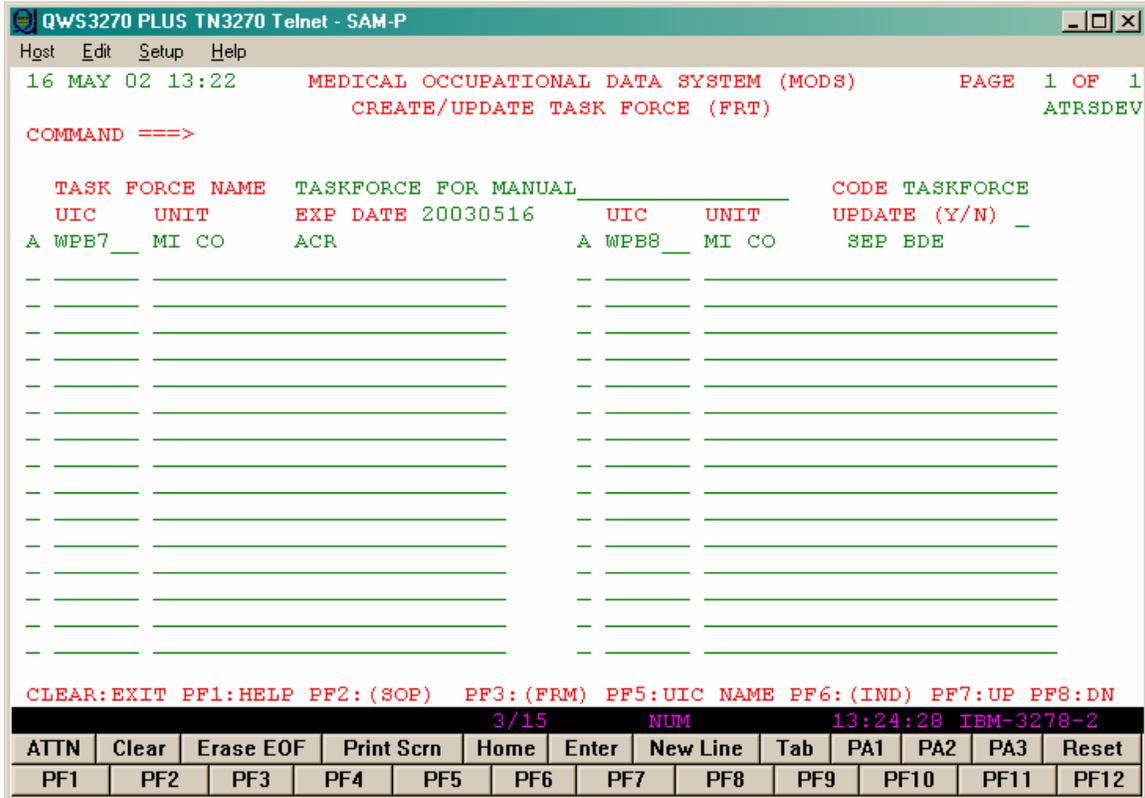

*Create/Update Task Force (FRT)*

<TAB> to the next underscore and type in the UIC of the first unit you want to add to the task force. Continue to add all of the UIC's that will make up the Task Force

**To build a Task Force for only non-Army personnel, you should create a false UIC. When you press F5 to post the unit name “Not in TAADS” will appear under the unit column. Then you may add all non-Army personnel into that Task Force as necessary.**

*Follow instructions above and continue to next page...*

# MEDPROS Immunization Tracking Module

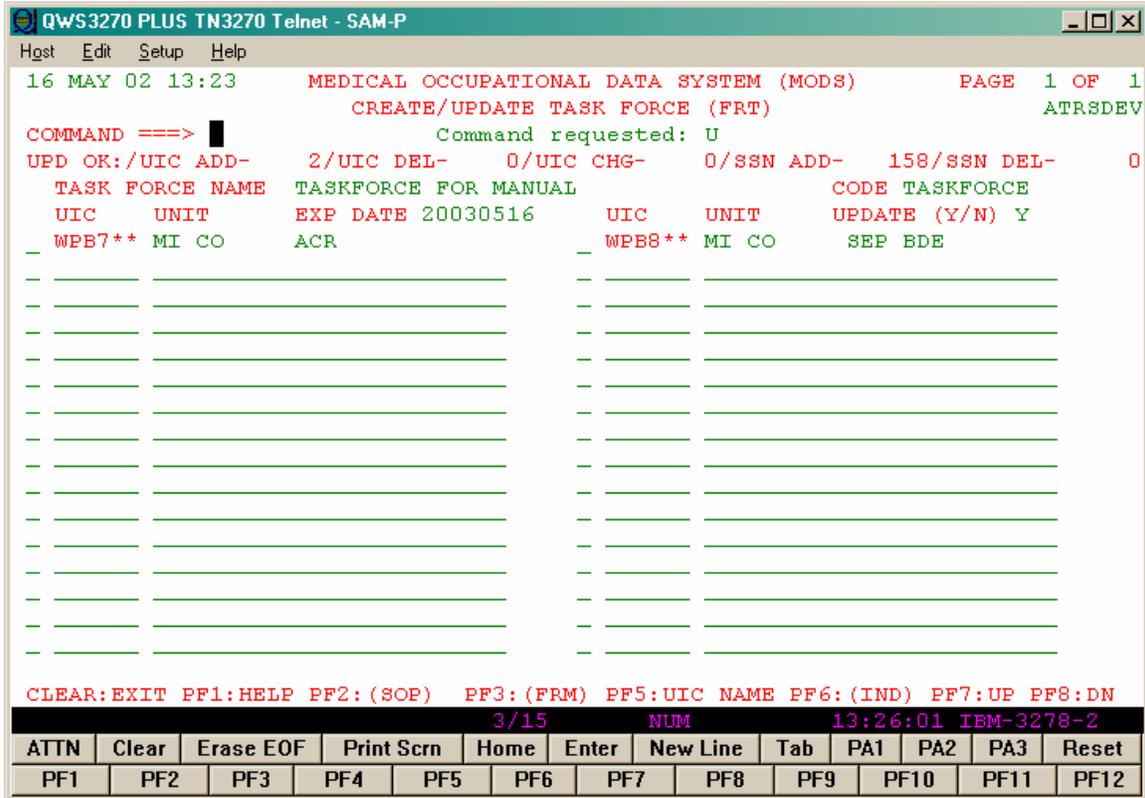

*Create/Update Task Force (FRT)*

Press <F5> and MODS will display the unit name from the TAADS associated with the UIC. This is to insure that only the proper units are being added to the task force prior to the actual building of the task force.

The task force will not be built until all of the UIC's have been entered, identified and verified by you. Repeat until all of the UIC's have been entered. You can add up to thirty-two UIC's on one page. Press <F8> for additional pages if necessary.

***Press <F5> to post the unit names from TAADS.***

# MEDPROS Immunization Tracking Module

### *Create/Update Task Force (FRT)*

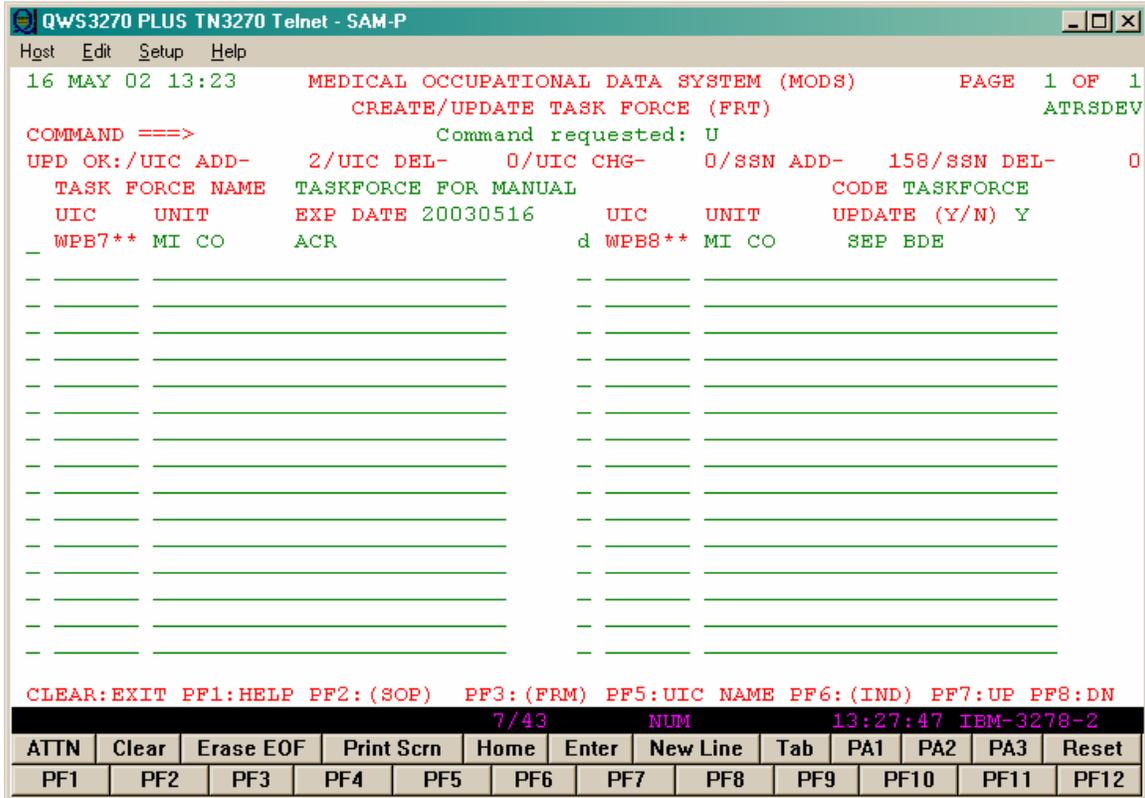

Once all of the UIC's have been entered and verified, it is time to actually build the TASK FORCE.

Type "U" for UPDATE at the COMMAND PROMPT, then press <ENTER>. This builds the new TASK FORCE.

**For a non-Army Task Force, the system will post "Unit name not in TAADS." This would also appear in cases where an Army UIC cannot be found in the data base. In this case, you will need to double check the UIC entered.**

*At the COMMAND PROMPT, type the letter "U" (for update),  
then press <ENTER>.*

# MEDPROS Immunization Tracking Module

### *Create/Update Task Force (FRT)*

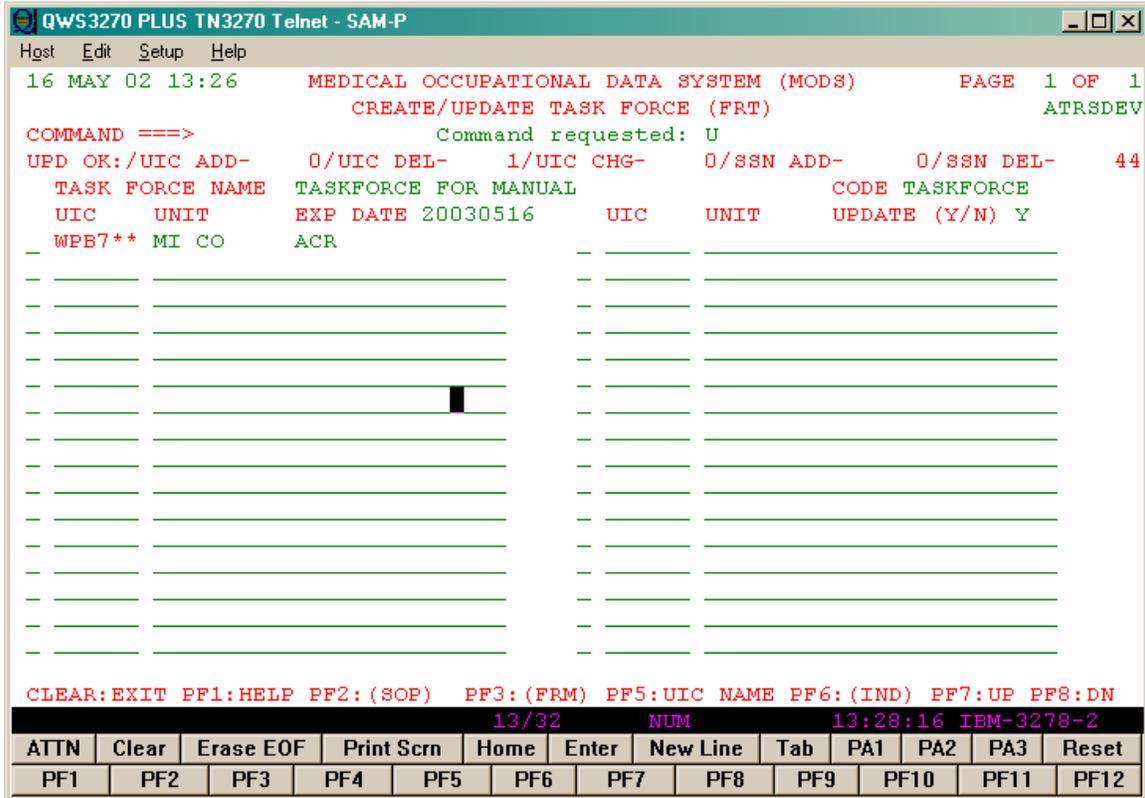

Individual or multiple UIC's can also be deleted from the TASK FORCE.

<TAB> to the underscore located to the left of the UIC you want to remove from the TASK FORCE. Type "D" for DELETE.

At the COMMAND PROMPT, type "U" for UPDATE, then press <ENTER>. This deletes the UIC from the TASK FORCE.

***<TAB> to UIC to be deleted, type "D".  
Type "U" at the Command Prompt, press <Enter>.***

# MEDPROS Immunization Tracking Module

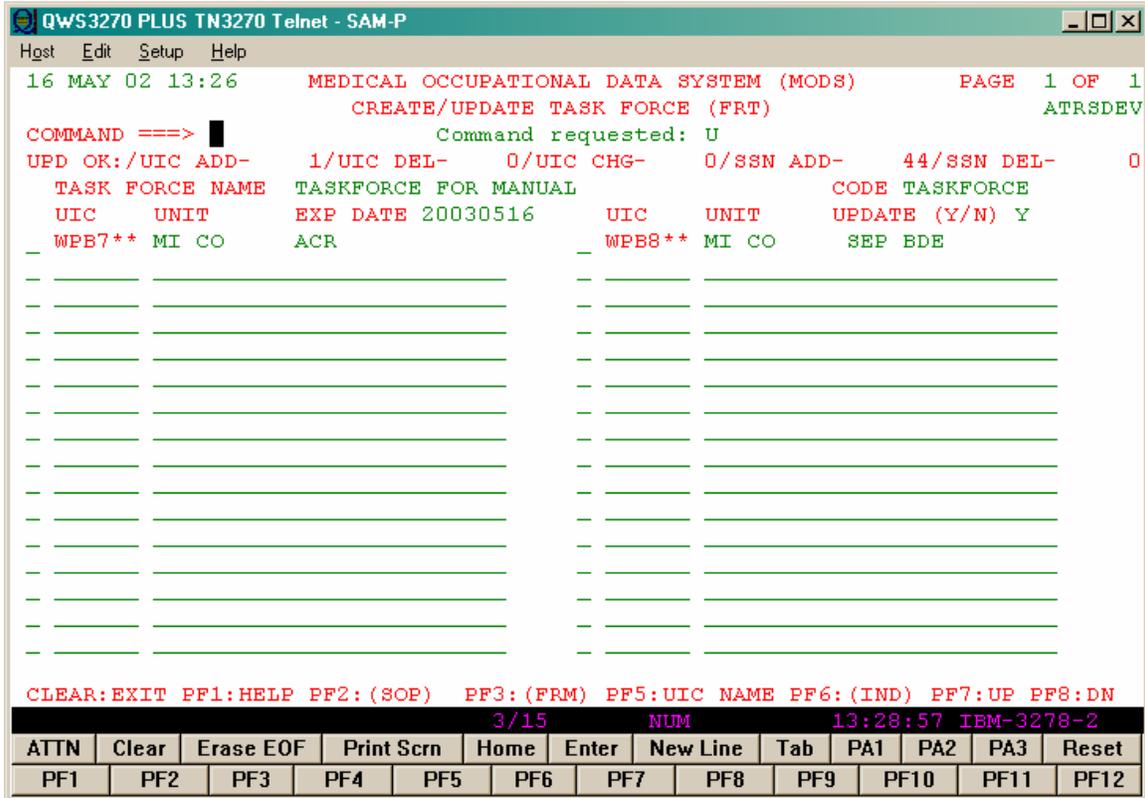

*Create/Update Task Force (FRT)*

The unit has been successfully removed from the TASK FORCE.

*Continue to the next page...*

# MEDPROS Immunization Tracking Module

### *Create/Update Task Force (FRT)*

Add the deleted UIC back and rebuild the TASK FORCE by typing “U” at the COMMAND PROMPT, “A” at the left underscore, type in the UIC, then press <ENTER>.

Once the TASK FORCE has been built, you can view the new TASK FORCE Alpha Roster by pressing <F6>.

**For a non-Army Task Force, a blank page will appear for entering information on non-Army personnel.**

***Press <F6> to view Alpha Roster of the new Task Force.***

*Create/Update Task Force By SSN (FRU)*

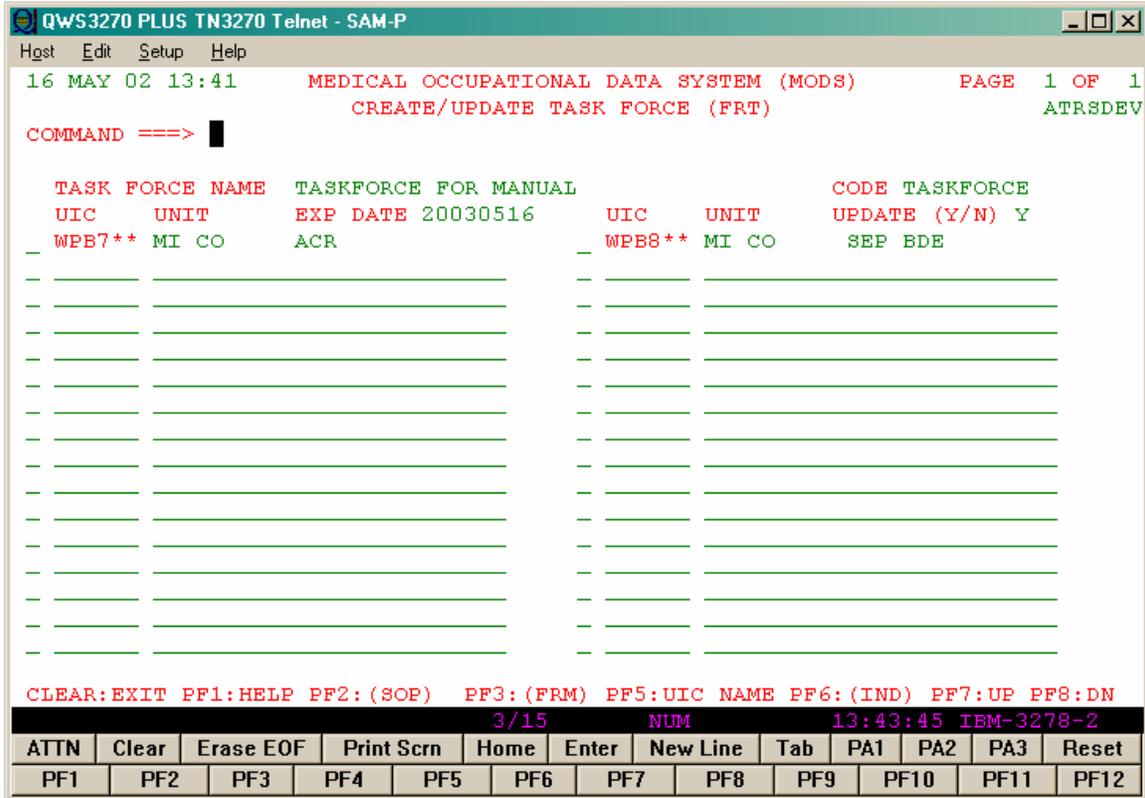

Individuals can be added to the Unit or Task Force alpha roster by tabbing to the next available open space or over typing another's information with the new individuals information.

*Continue to the next page...*

# MEDPROS Immunization Tracking Module

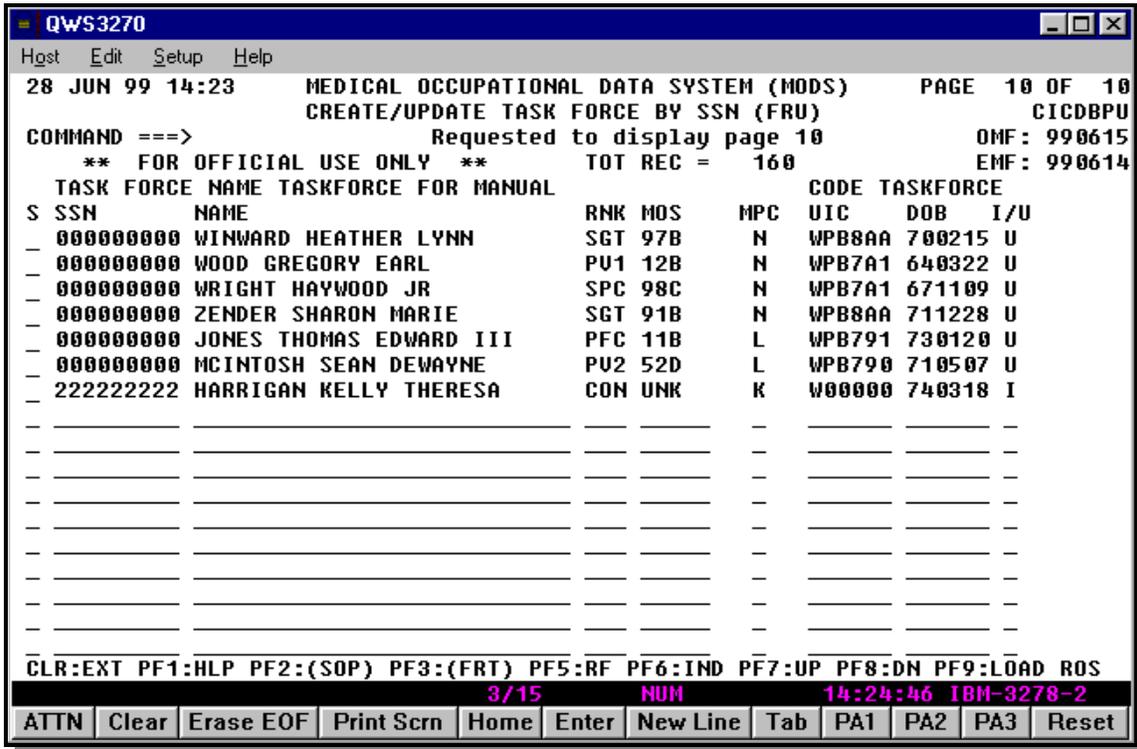

*Create/Update Task Force (FRT)*

To view the individuals added to the roster press <F6> or mouse click <F6> at the bottom of your screen.

***Press <F6> to view the individuals added to the roster.***

# MEDPROS Immunization Tracking Module

*Create/Update Task Force By SSN (FRU)*

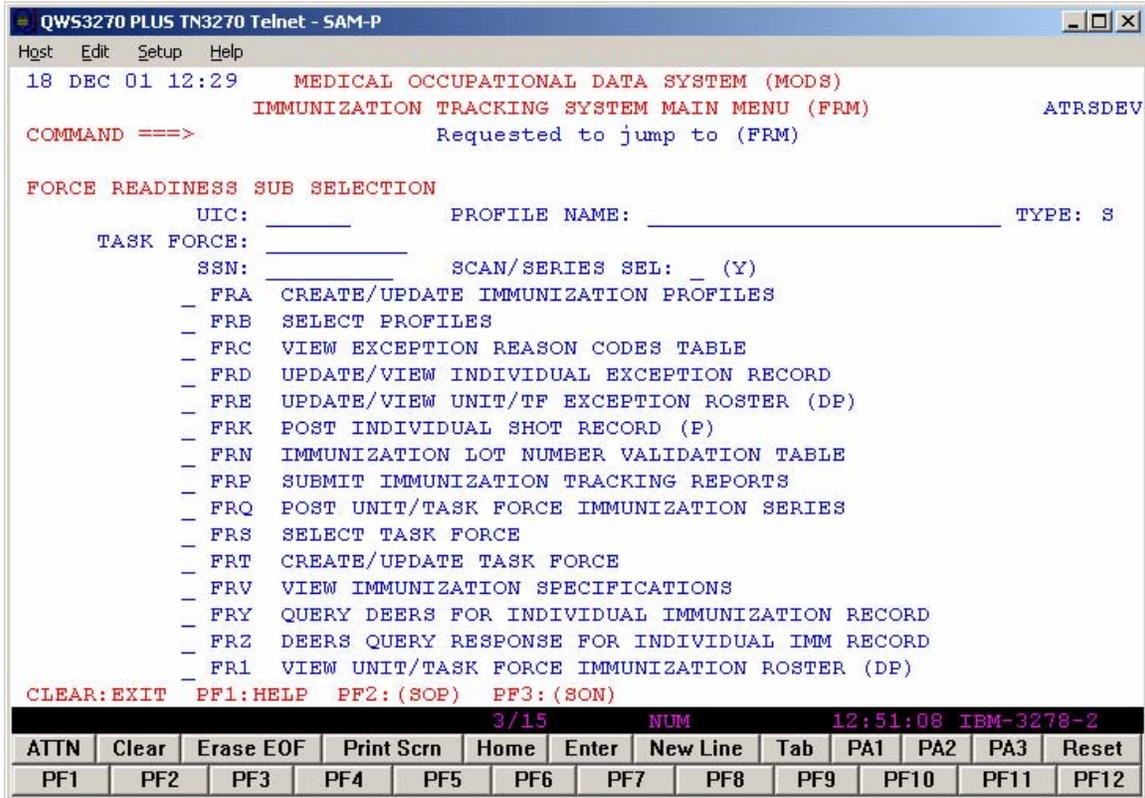

Type “F” <space> then the first few chars of the individual’s last name, then <ENTER>. This will bring you to the first match of the chars selected. Find the individual, you will notice that the individual has been added to the roster. The individual is now part of your Task Force and will appear on all future reports and rosters.

**\*IMPORTANT MESSAGE\*** Recent changes to the system allow you to use individual SSNs and UICs in more than one taskforce.

*To Delete a Task Force, type delete at the command prompt*

*Press <F3> to return to FRT, <F3> again to return to FRM.*

# MEDPROS Immunization Tracking Module

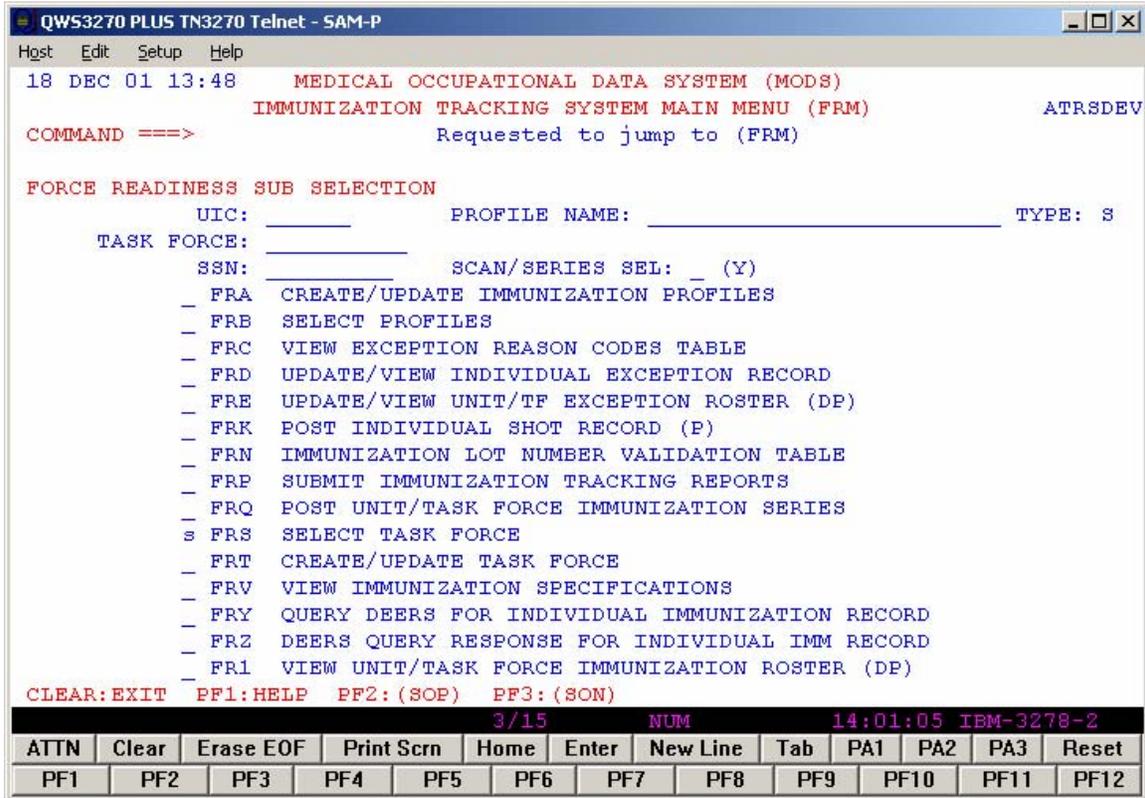

*Immunization Tracking System Main Menu (FRM)*

You can either select another menu option or return to MODS System Option Panel (SOP).

***Press <F2> to return (SOP).***

# **Chapter 14 – Select a Task Force (FRS)**

# MEDPROS Immunization Tracking Module

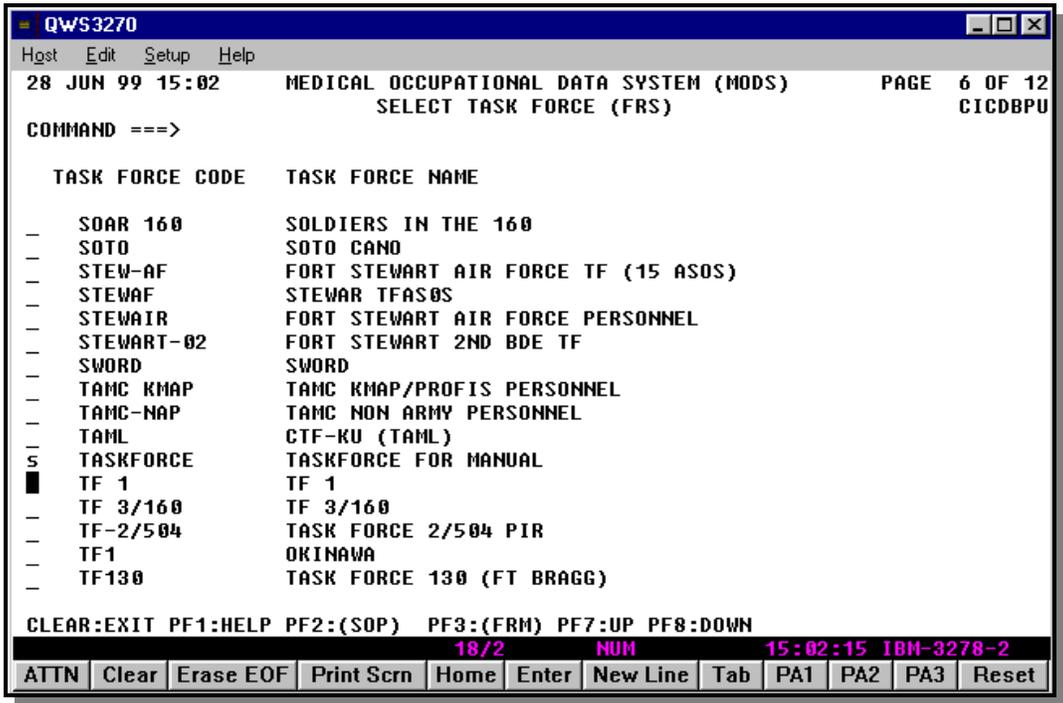

*Immunization Tracking System Main Menu (FRM)*

Quick access to a TASK FORCE can be achieved by selecting Select Task ForCE (FRS).

You can recall a Task Force by selecting it from a list. This is handy in the event you cannot remember the Task Force Code or Name.

**<TAB> to FRS and type "S" on the left underscore and press <ENTER>.**

# MEDPROS Immunization Tracking Module

*Select Task Force (FRS)*

The list of Task Forces and Task Force Codes appear.

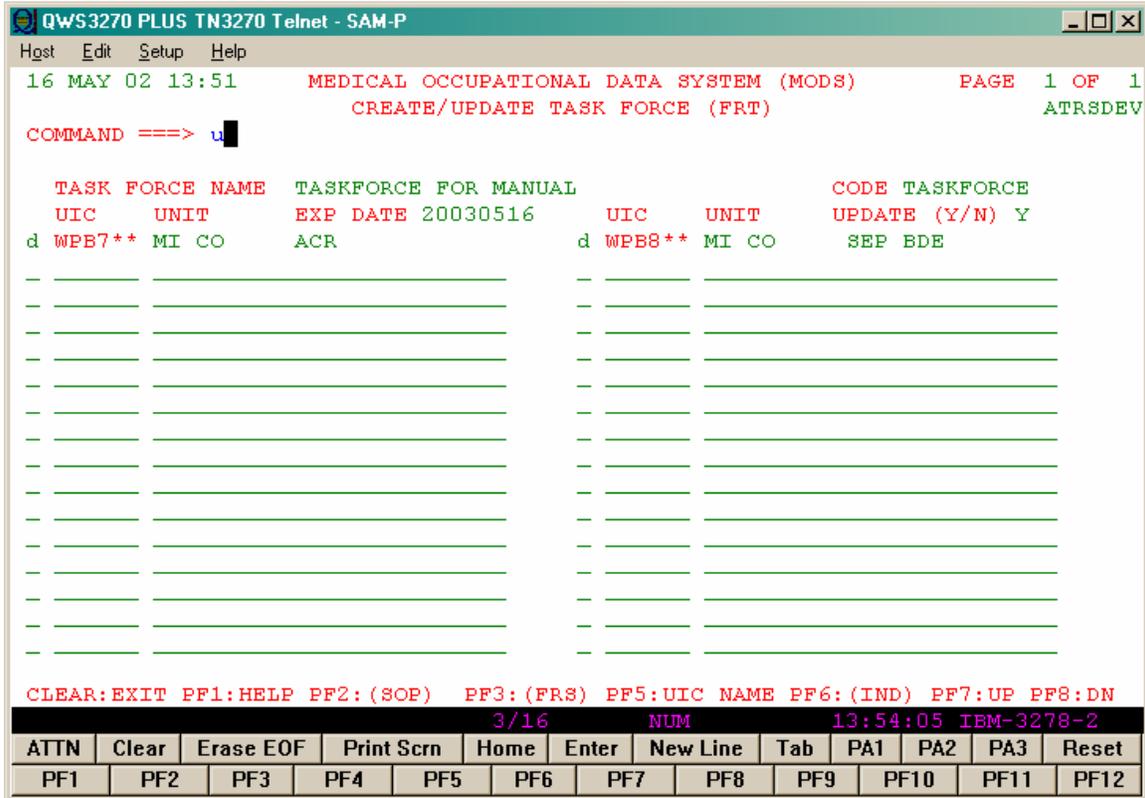

To view a Task Force, <TAB> to the Task Force you wish to recall, type “S” on the underscore and press the <ENTER> key.

Press F8 or F7 to view other pages of the Task Force Selection Screen.

***<TAB> to the Task Force you wish to recall,  
type “S” on the left underscore, press <ENTER>.***

# MEDPROS Immunization Tracking Module

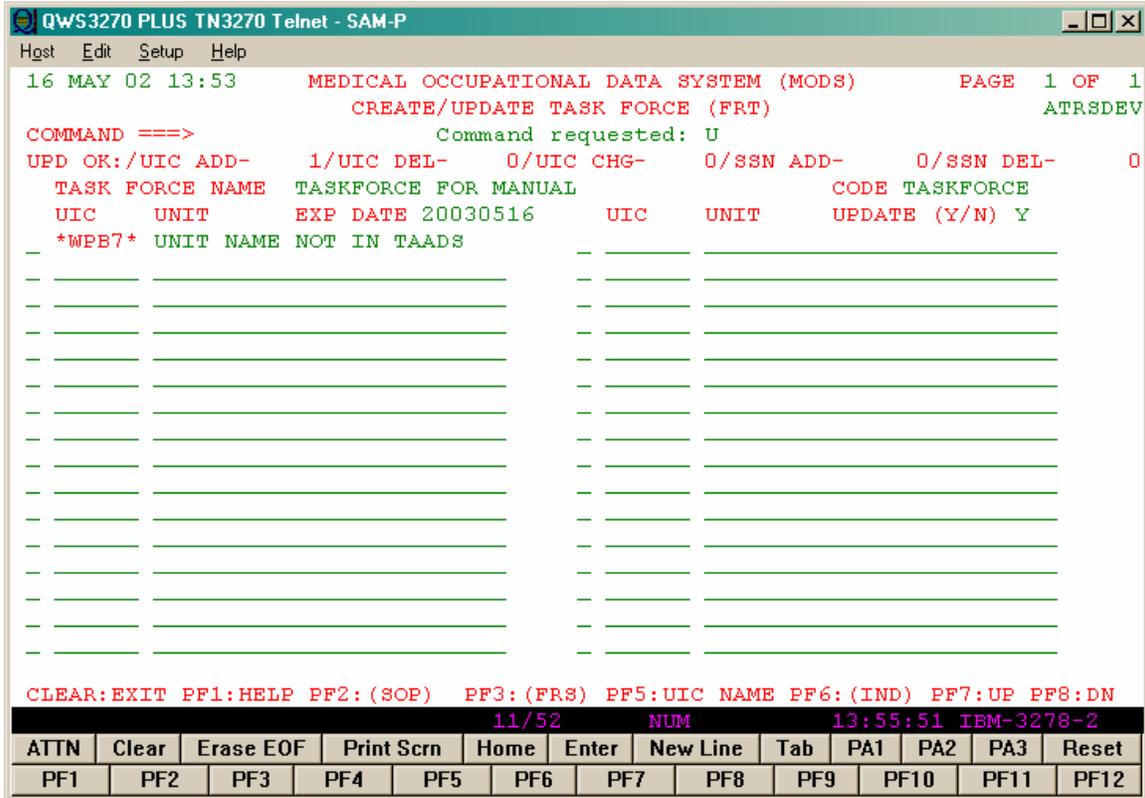

### *Create/Update Task Force (FRT)*

This is a handy place to clean up your Task Forces. You should always delete Task Forces when you are done with them. Even though you delete a Task Force, individual immunization records will not be affected. All entries will remain intact.

To delete your Task Force, you need to remove the individual units from the Task Force.

***<TAB> to the left underscore beside each UIC, type “D” for DELETE.  
Type “U” at the COMMAND PROMPT, then Press <ENTER>.  
To delete the entire task force, type “DELETE” at the command prompt  
then press <ENTER>.***

# MEDPROS Immunization Tracking Module

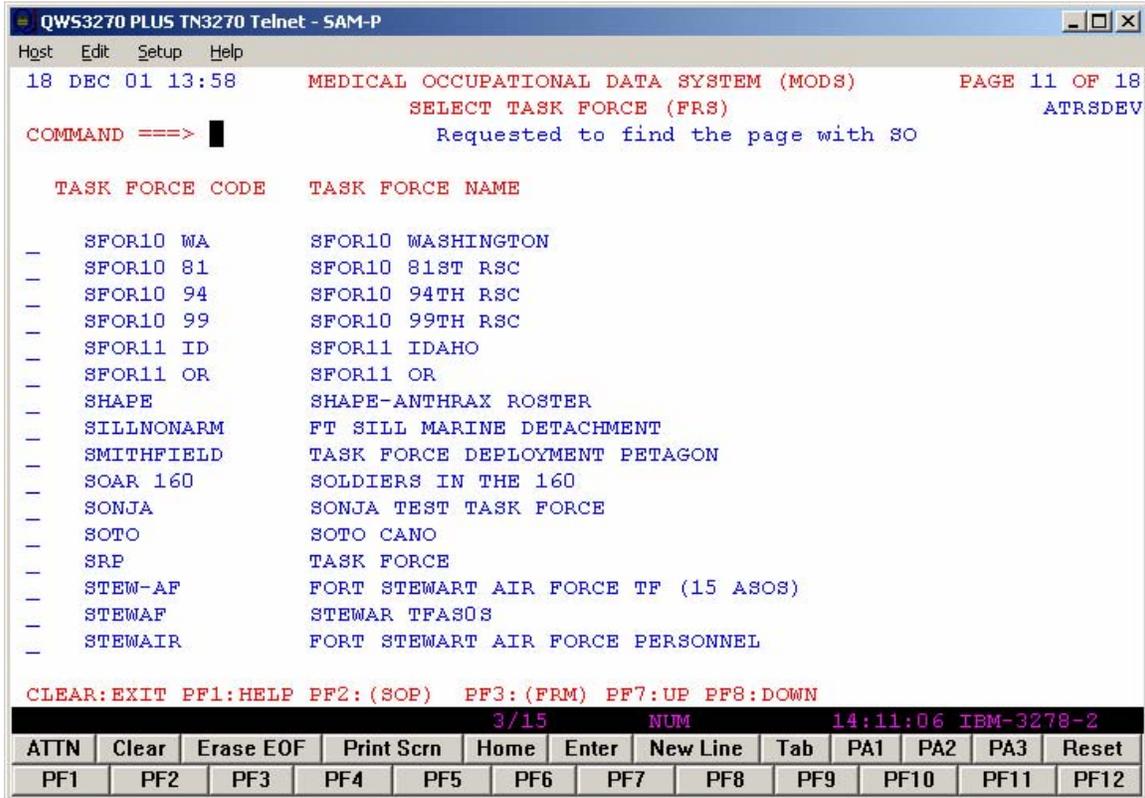

*Create/Update Task Force Panel (FRT)*

Once the units are removed, the Task Force automatically disappears. Individual immunization records can be accessed either by SSN or their UIC.

A message will appear under the COMMAND PROMPT telling you that *Num* UIC's were successfully deleted/changed.

***Press <F3> to return to Task Force Listing (FRY).***

# MEDPROS Immunization Tracking Module

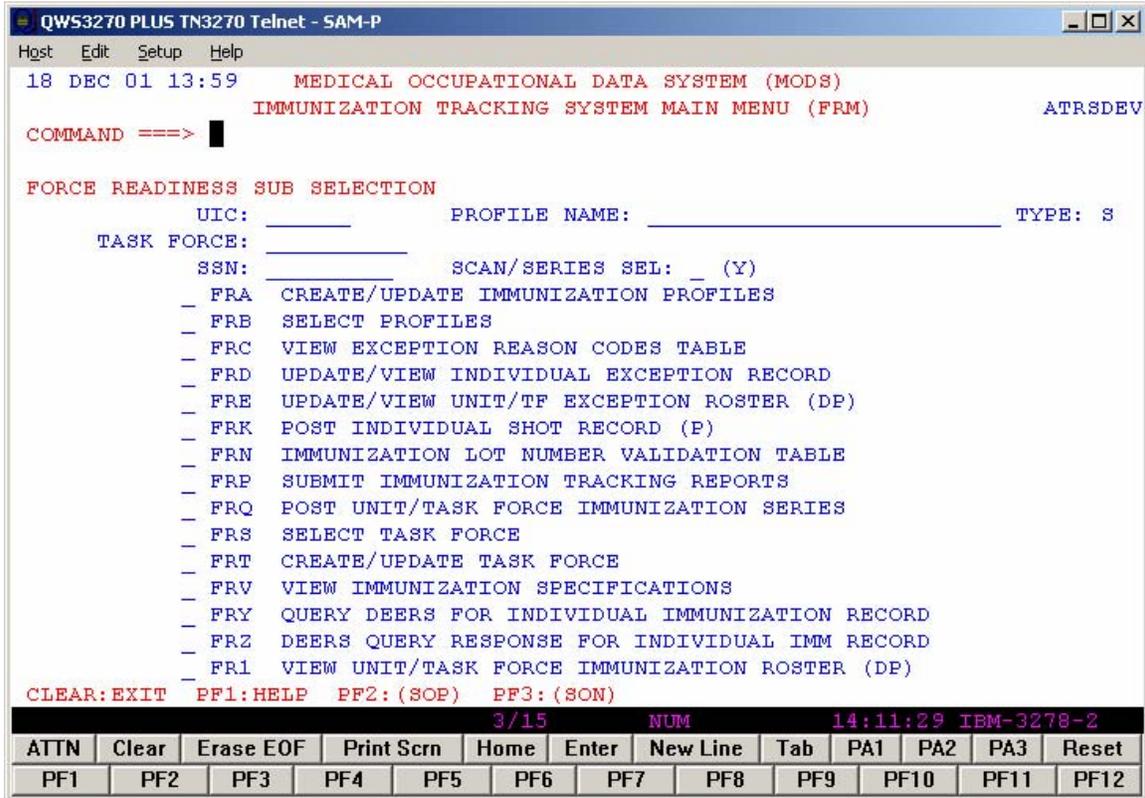

*Task Force Selection Panel (FRS)*

You can see that your Task Force has been eliminated.

***Press <F3> to return to Immunization Tracking System Main Menu (FRM).***

# MEDPROS Immunization Tracking Module

*Immunization Tracking System Main Menu (FRM)*

You can either select another menu option or return to MODS System Option Panel (SOP).

***Press <F2> or click <PF2> to return (SOP).***

### *Unit Immunization Roster Print (FRW)*

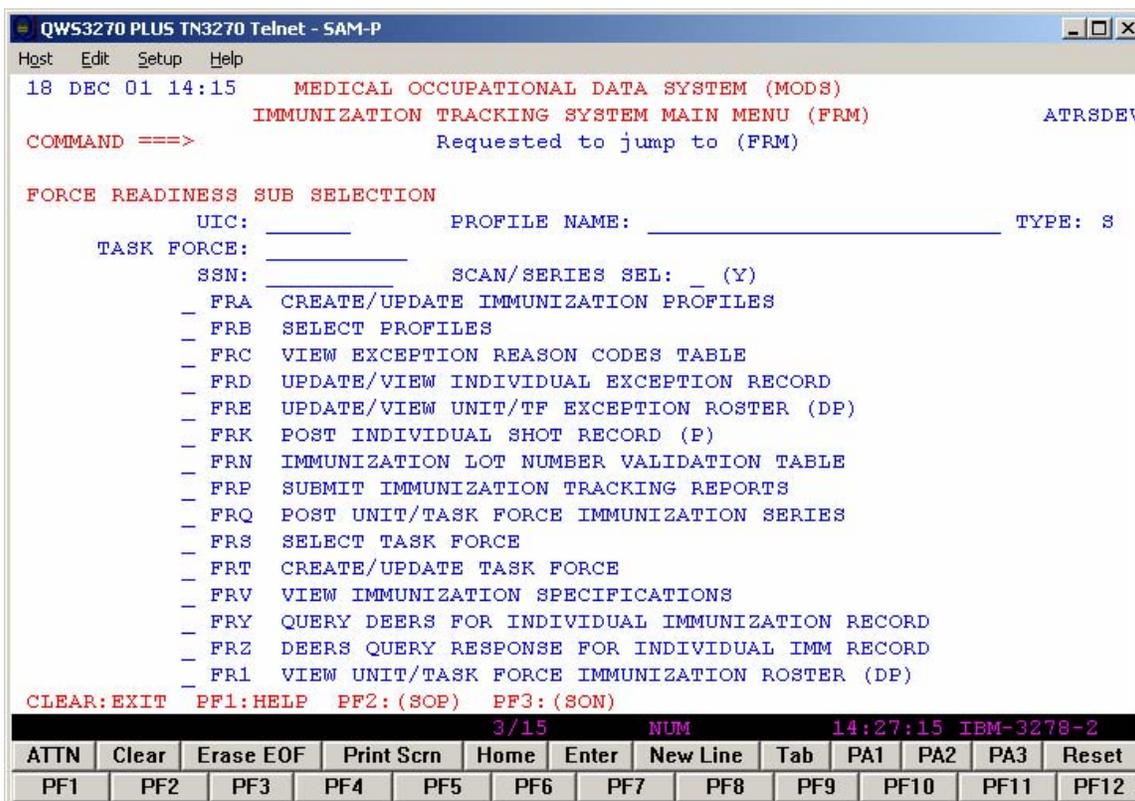

There are two different reports available on this panel. Press <TAB> to IMMUNIZATION ROSTER OPTIONS, and type either “1” or “2” depending on which report you want to select.

The cursor advances and you will see either your dedicated printer ID or the word “FILE”. “FILE” indicates that a dataset will be written and stored for download in your TSO storage area. Refer to Chapter 14 of the *Supplemental Manual* for download instructions.

<TAB> to the bottom and type a TITLE that will be displayed at the top of each report page.

***Fill in the blanks, then press <ENTER> to submit print job.  
Press <F3> to return to roster and menu.***

# MEDPROS Immunization Tracking Module

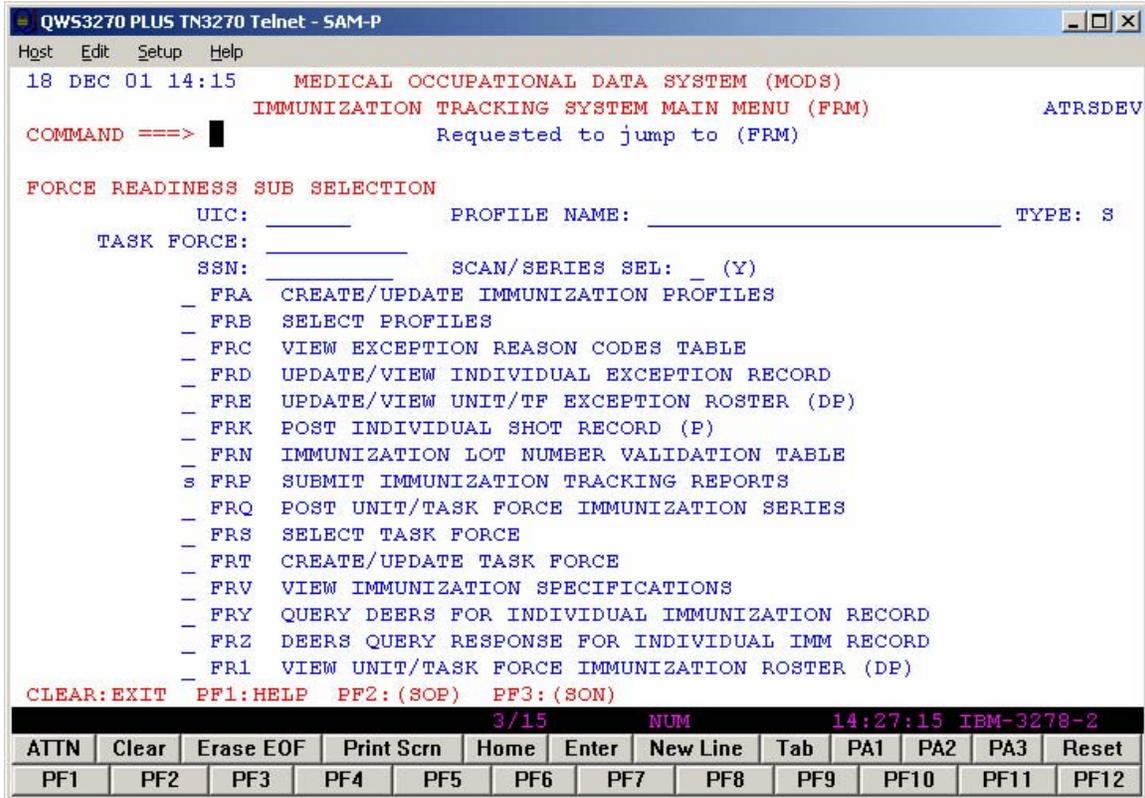

*Immunization Tracking System Main Menu (FRM)*

You can either select another menu option or return to MODS System Option Panel (SOP).

***Press <F2> to return to (SOP).***

**Chapter 16 – Immunization  
Tracking Reports  
(FRP)**

# MEDPROS Immunization Tracking Module

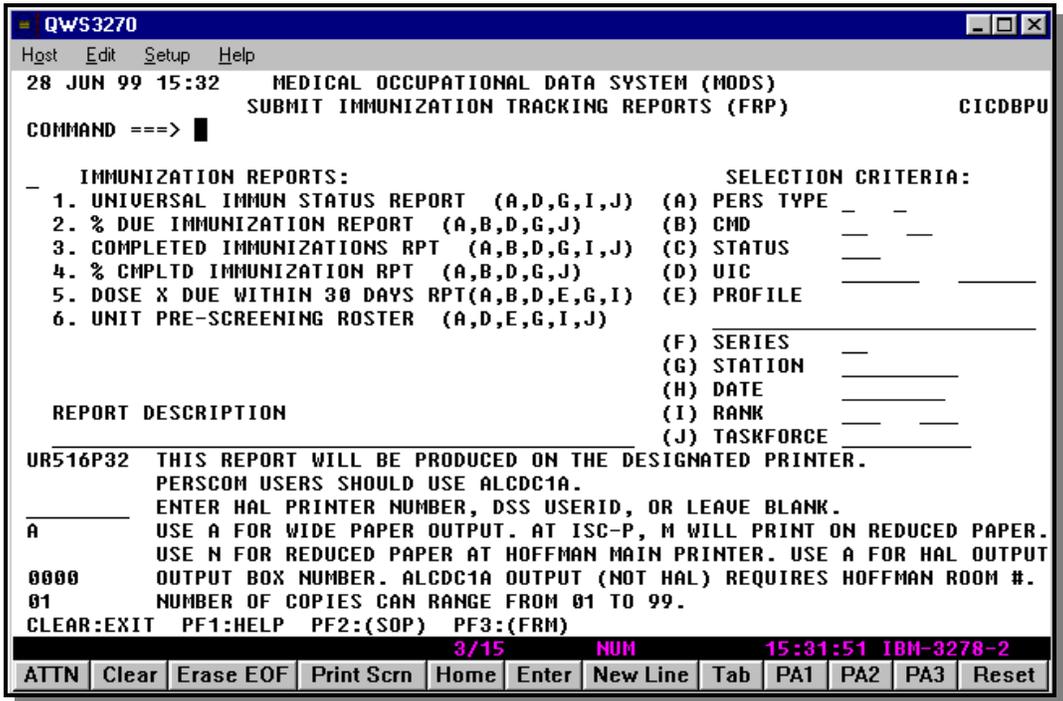

*Immunization Tracking System Main Menu (FRM)*

There are six reports available for downloading and/or printing. These reports were specifically designed to assist Commanders in monitoring the immunization readiness status of their unit.

Since MODS is a real-time system, Commanders can see the true immunization posture of their unit anytime they want. These reports will also assist Commanders in determining who is due for immunizations to insure that no-one misses an immunization within a series.

**<TAB> to FRP, type “S” on the underscore, then press <ENTER>.**

# MEDPROS Immunization Tracking Module

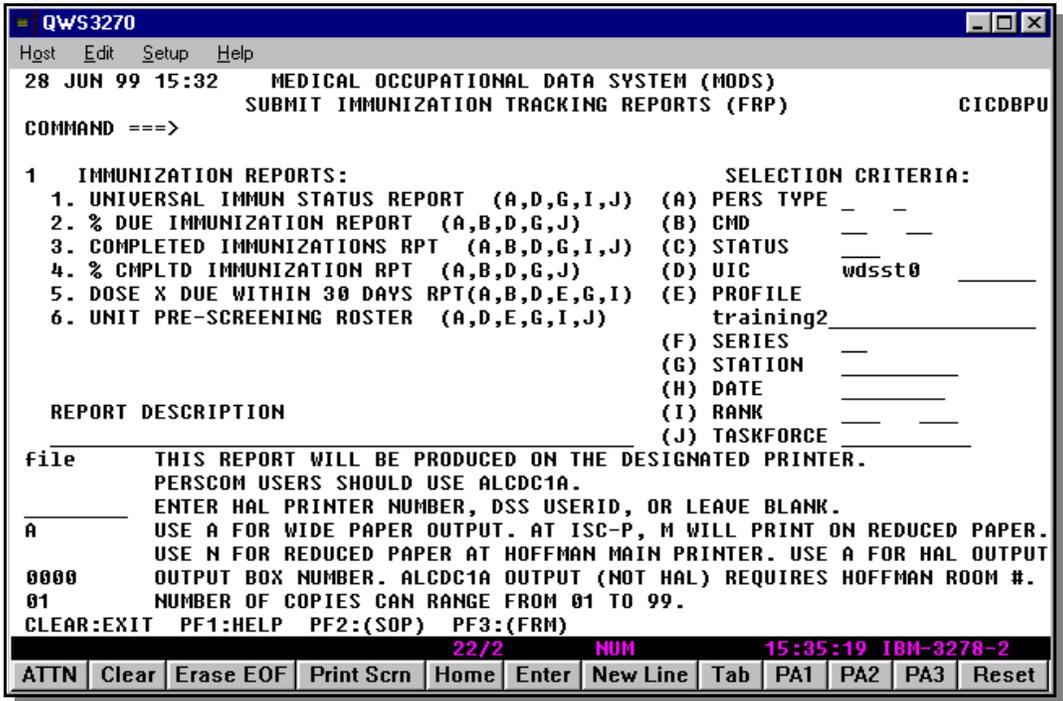

### *Immunization Tracking Reports (FRP)*

The six reports currently available are listed under “IMMUNIZATION REPORTS”. The specific “SELECTION CRITERIA” that applies to each report is displayed at the end of the report title line within parentheses.

***Press <TAB> to “IMMUNIZATION REPORTS” and type the number of the report you want to select.***

***Continue to the next page...***

# MEDPROS Immunization Tracking Module

### *Submit Immunization Tracking Reports (FRP)*

The cursor advances and you must choose one of the selections listed under “A-K”. Type in the appropriate selection criteria.

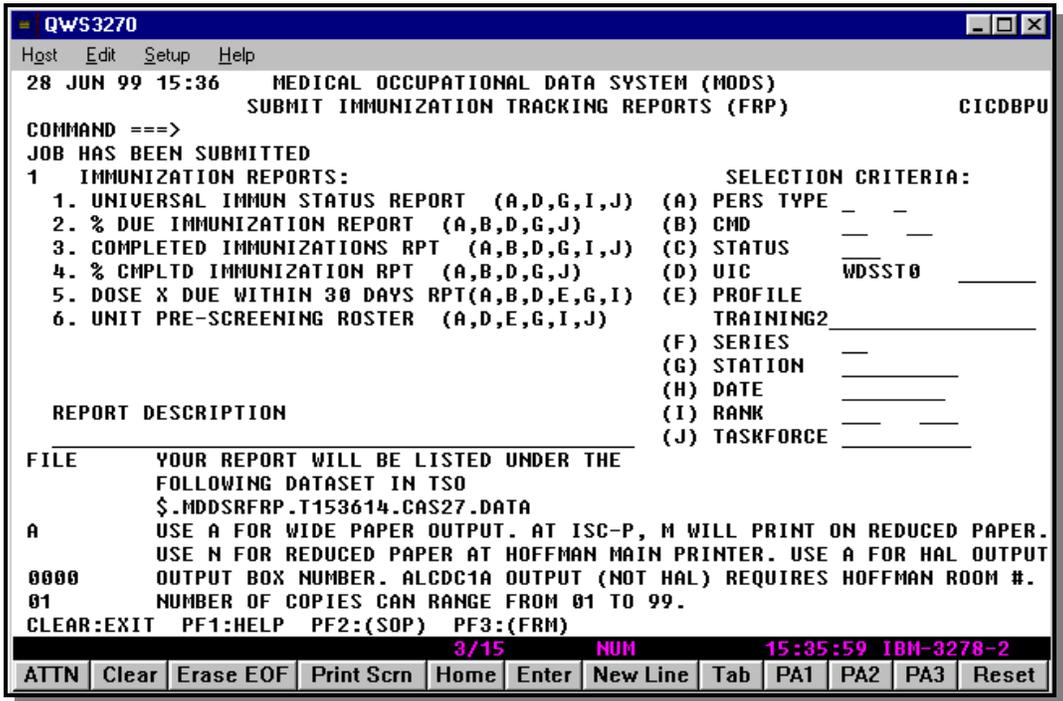

<TAB> to the “REPORT DESCRIPTION”, then type a TITLE that will be displayed at the top of each report page.

You will see either your dedicated printer ID or the word “FILE”. “FILE” indicates that a dataset will be written and stored for download in your TSO storage area. Refer to Chapter 14 of the *Supplemental Manual* for download instructions.

*Follow the instructions above.*

*Continue to next page...*

# MEDPROS Immunization Tracking Module

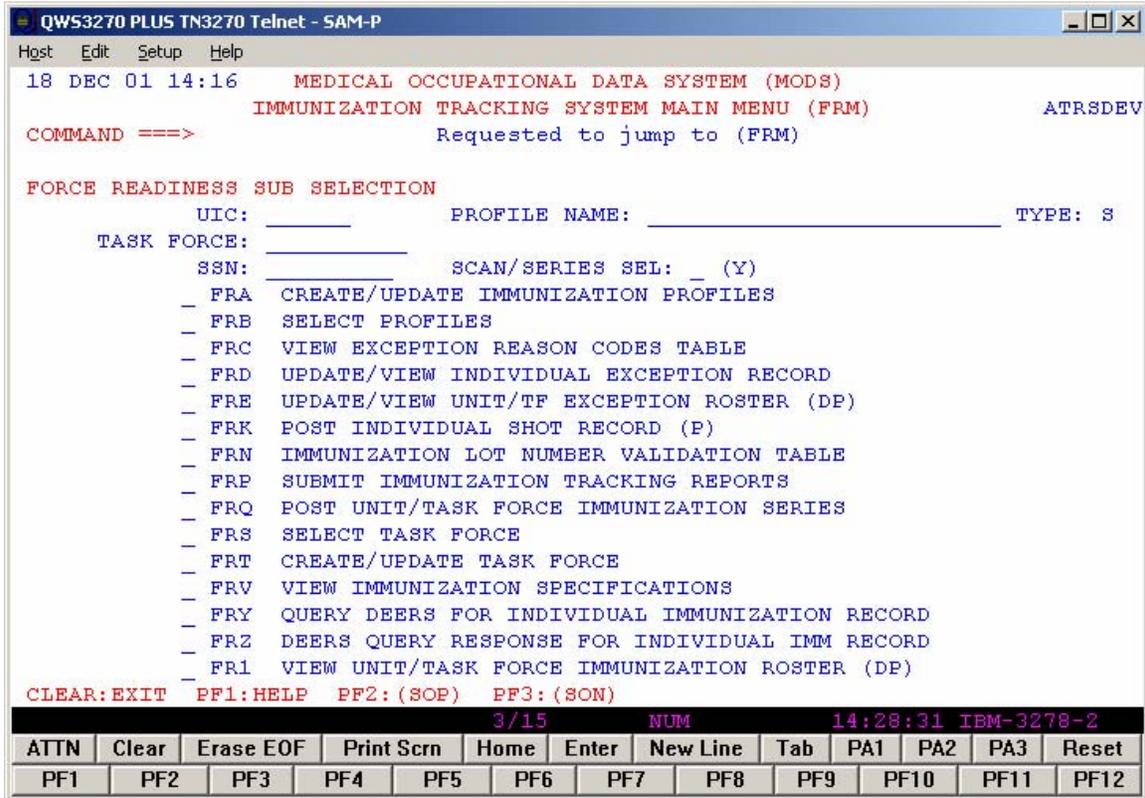

*Submit Immunization Tracking Reports (FRP)*

Once all of the selections have been correctly filled out, press <ENTER>. The message “JOB HAS BEEN SUBMITTED” will appear under the COMMAND PROMPT line.

*Press Enter to submit the job.*

*Press <F3> to return to the MEDPROS Main Menu.*

# MEDPROS Immunization Tracking Module

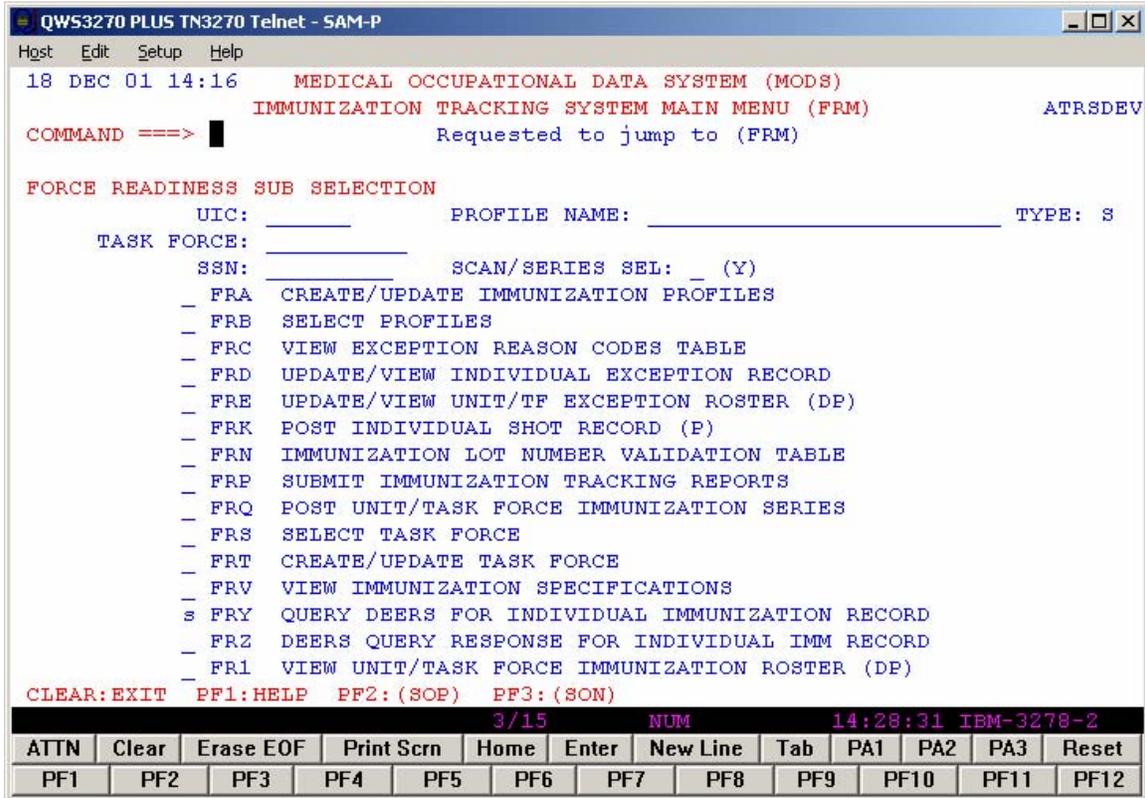

*Immunization Tracking System Main Menu (FRM)*

You can either select another menu option or return to MODS System Option Panel (SOP).

***Press <F2> or click <PF2> to return (SOP).***

**Chapter 17 – Query and  
Retrieve Individual  
Immunization Record from  
DEERS  
(FRY/FRZ)**

# MEDPROS Immunization Tracking Module

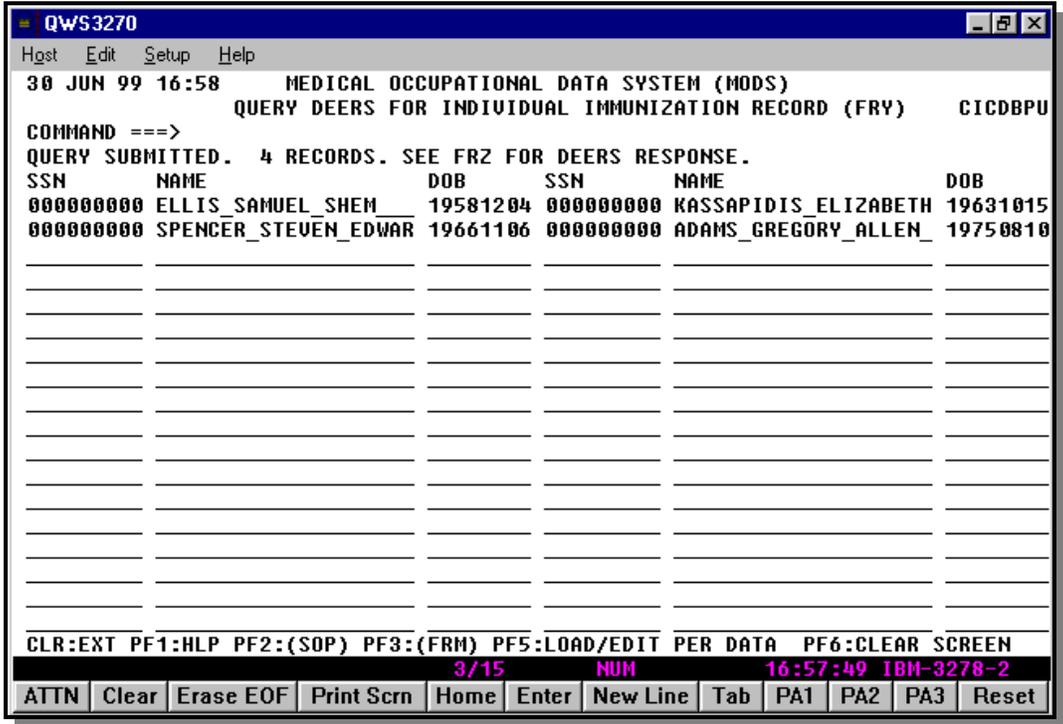

*Medical Protection System (MEDPROS) (FRM)*

From the Medical Protection System (MEDPROS) (FRM) select Query DEERS For Individual Immunization Record (FRY) by typing “S” on the underscore, then pressing <ENTER>. Or use the quick navigational Unique Panel Identifier by typing “=FRY” on the Command line, press <ENTER>.

***To select the Query DEERS for Individual Immunization record,  
TAB to (FRY), type an “S”, press <ENTER>.***

# MEDPROS Immunization Tracking Module

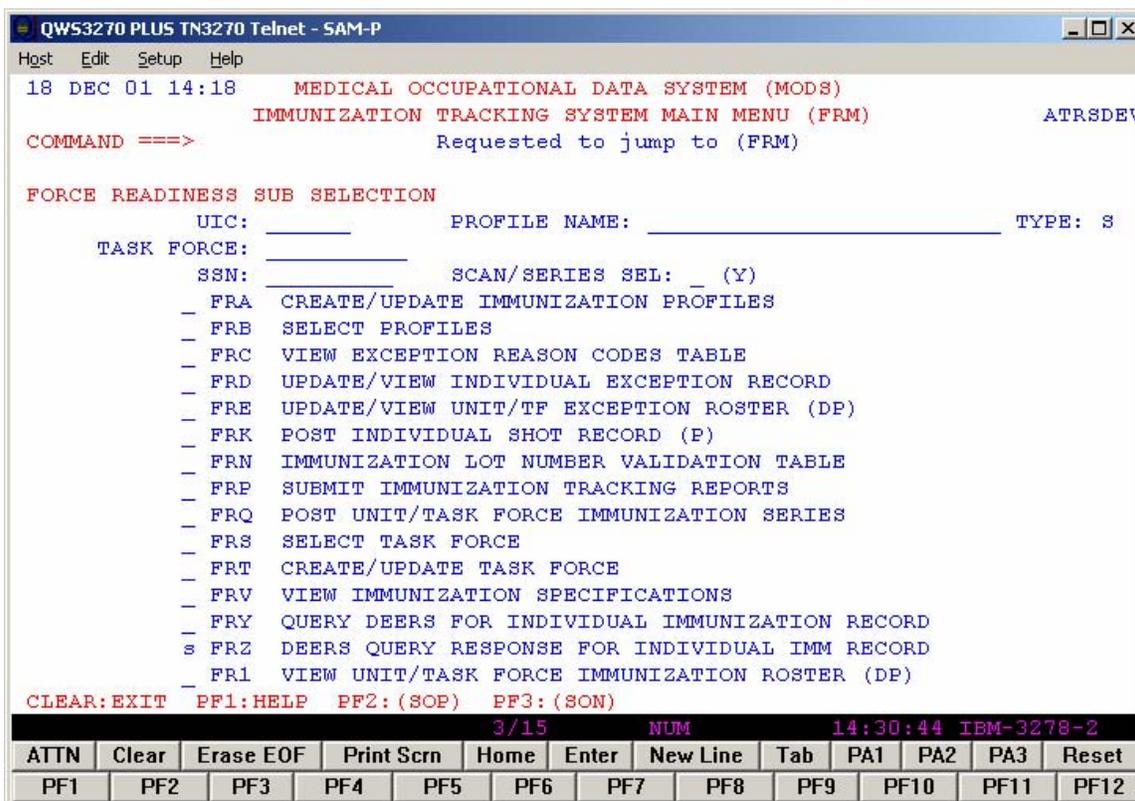

*Query DEERS for Individual Immunization Record (FRY)*

The Query DEERS for Individual Immunization Record (FRY) allows you to query an individual’s immunization record from DEERS. All Services currently send their data to DEERS on each immunization administered and DEERS provides the program status reports. If an individual received shots from another service and they do not show up on that individual’s MEDPROS shot record, you can query the information from DEERS using (FRY). If DEERS shows that the individual did receive those shots, then you can input them on the individual’s shot record.

To query individual immunization records from DEERS, type in the SSN, Last and First name, and date of birth (if you do not know the DOB type all 0’s) for each individual whose shot record you are looking up. Press F5, then press <ENTER>. You will see QUERY SUBMITTED below the Command line when the query is sent to DEERS. (It may take from 5 to 10 min. for the query to be processed by DEERS.)

*Follow instructions above and continue to next page...*

# MEDPROS Immunization Tracking Module

*Immunization Tracking System Main Menu (FRM)*

The Force Readiness Query Response will take between ten and twenty minutes to return from DEERS.

To retrieve the query response, access the DEERS Query Response for Individual IMM Record screen by tabbing to the underscore to the left of FRZ, typing “S” and pressing Enter. Tab to the SSN line. Type the individual’s SSN and press <ENTER>. The Query Response will appear. Remember, it may take from 10 to 20 minutes before the Query Response may be accessed. **(If you do not receive a response within 30 minutes, resubmit the SSN).**

***Select FRZ from the MEDPROS Main Menu.  
Tab to the SSN line. Type in the SSN, press <ENTER>.***

*DEERS Query Response for Individual IMM Record (FRZ)*

The FORCE READINESS Query Response from DEERS will appear on your screen. To view more of the Immunization information, or the next person for whom a query was submitted, press F8 (page down).

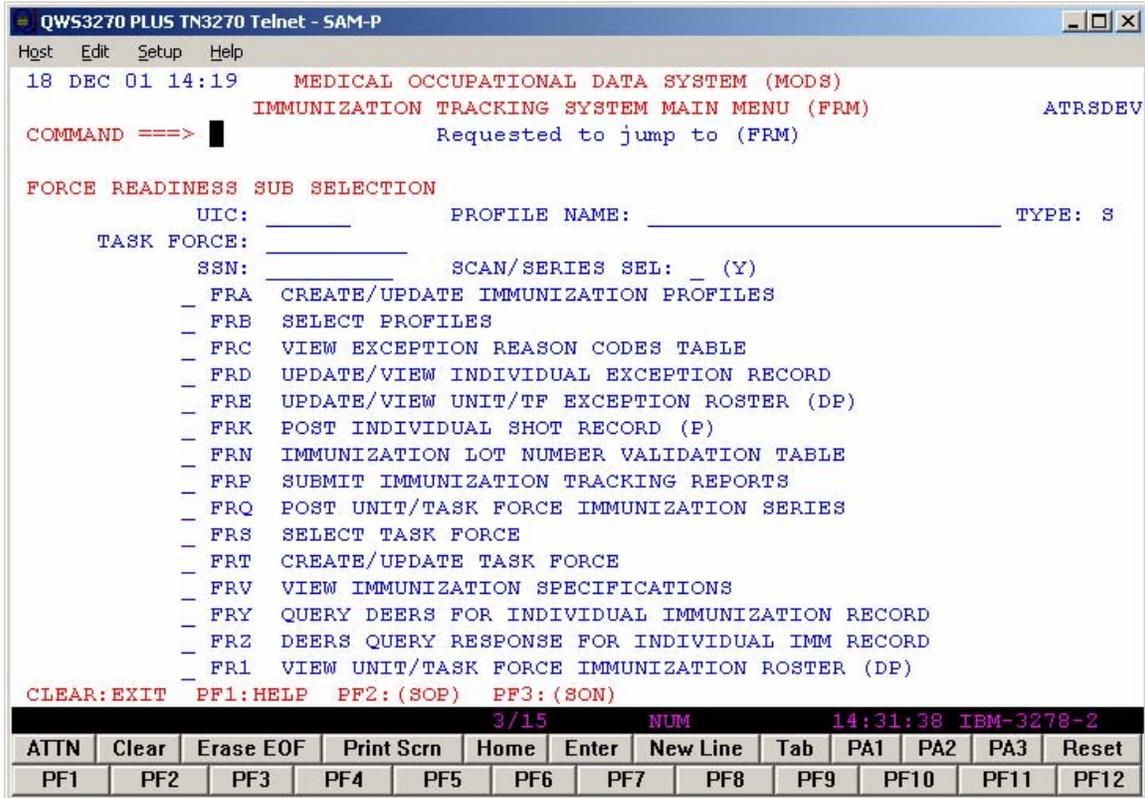

If you receive a message that says’ “SHOT DATA FOR REQUESTED SSN NOT YET RECEIVED.” wait for a few minutes and try again.

**NOTE: If you do not receive a response within 30 minutes, resubmit the SSN.**

To return to the MEDPROS Main Menu (FMM), press the <F3> key or type “=FMM” on the Command line, and press <ENTER>.

*To return to the MEDPROS Main Menu (FMM),  
type “=FMM” on the Command line and press <ENTER>.*

# MEDPROS Immunization Tracking Module

*Immunization Tracking System Main Menu (FRM)*

You can either select another main menu option or return to MODS System Option Panel (SOP) by typing “=SOP” on the Command line and pressing <ENTER> or by pressing your <F2> key.

***To return to the System Option Panel,  
type “=SOP” on the Command line and press <ENTER>.***

**Chapter 18 – Medical  
Readiness Log Module  
(FLG)**

*Medical Protection System (MEDPROS) Main Menu (FMM)*

The Medical Readiness Log Manual enables supervisors to query MEDPROS for workload accomplished by their subordinates for a specific timeframe. By entering a zip code, location, command, UIC or the SSN or Logon Id along with a specific timeframe, supervisors may check the number of immunizations posted by their subordinates only for that timeframe. They may also drill down from the number of immunizations posted to see the names of personnel for whom immunizations were posted.

***On the FMM screen, tab down to FLG, type an “S” for select, then hit <Enter>.***

## MEDPROS Immunization Tracking Module

### *Medical Readiness Log Module (FLG)*

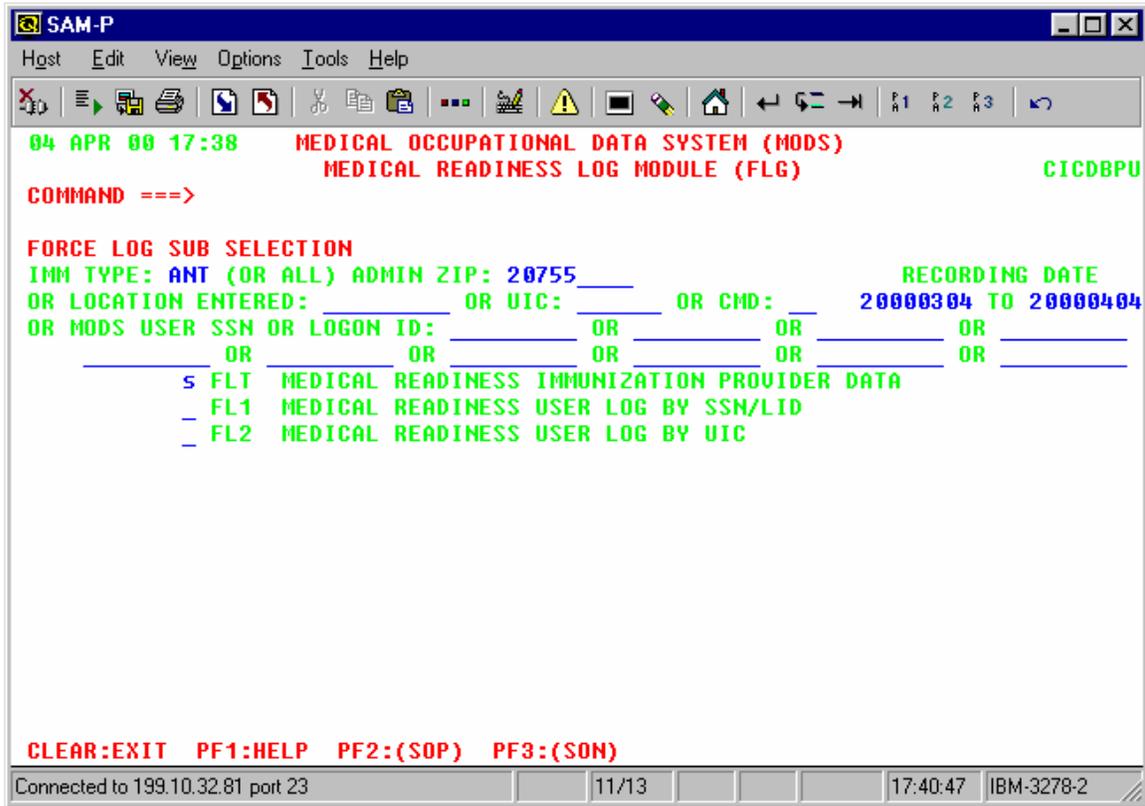

Using the FLT option from this screen (FLG) gives users several options:

- ◆ Enter a zip code to see a list of all personnel who posted immunizations that have been given at a specific zip code and the number of immunizations posted.
- ◆ Enter a location to see a list of all personnel who posted immunization that are currently assigned at that location and the number of immunizations posted.
- ◆ Enter a UIC to see a list of all personnel who posted immunizations that are currently assigned at that UIC and the number of immunizations posted.
- ◆ Enter a command code to see a list of all personnel who posted immunizations that are currently assigned to the command and the number of immunizations posted.
- ◆ Enter the SSN or LID of a MEDPROS user to see the number of immunization posted by that individual.

You may limit these queries by entering a specific timeframe in the Recording Date fields.

*Continue to the next page...*

# MEDPROS Immunization Tracking Module

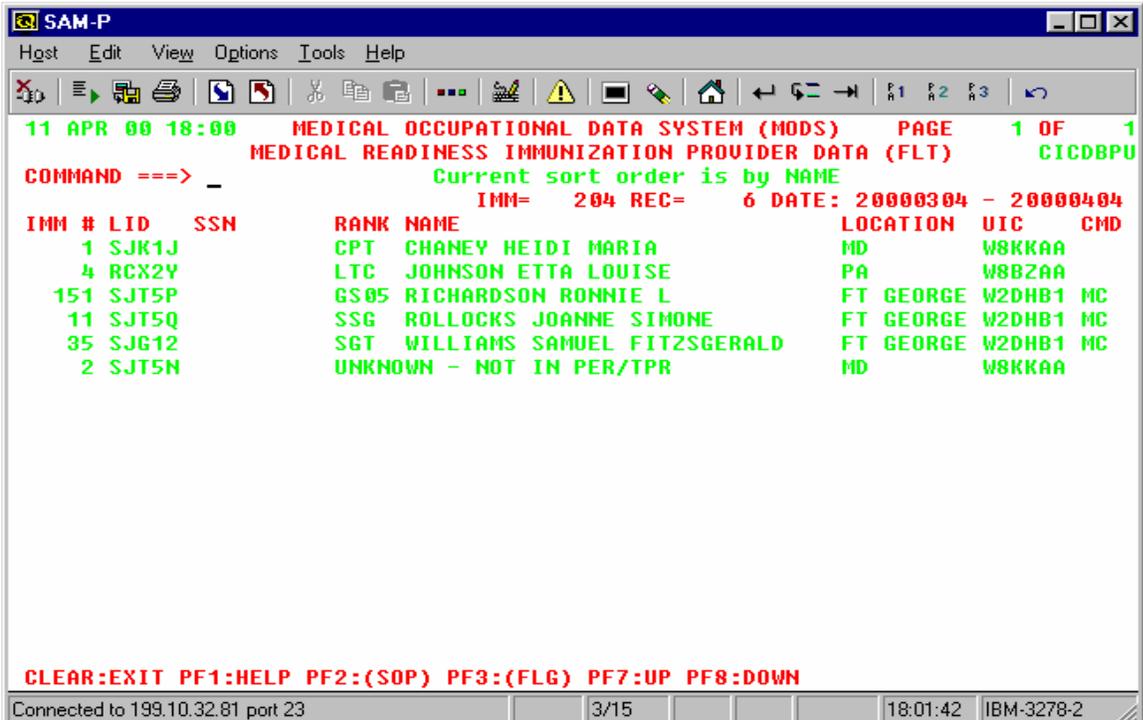

*Medical Readiness Log Module (FLG)*

In this training example, we entered a zip code and timeframe in the recording date fields. A list will be brought up that shows all users who have entered immunizations given at that zip code regardless of their current location. The recording date will limit the list you see by the timeframe entered, in this instance “20000304 to 20000404” will show only users who have entered immunizations in that timeframe who have entered immunizations for that zip code.

**For Medical Readiness Immunization Provider Data (FLT):**

- Enter a zip code, tab to the “Recording Date”, then enter in a timeframe. <TAB> down to the FLT, and type a “S” to select.

# MEDPROS Immunization Tracking Module

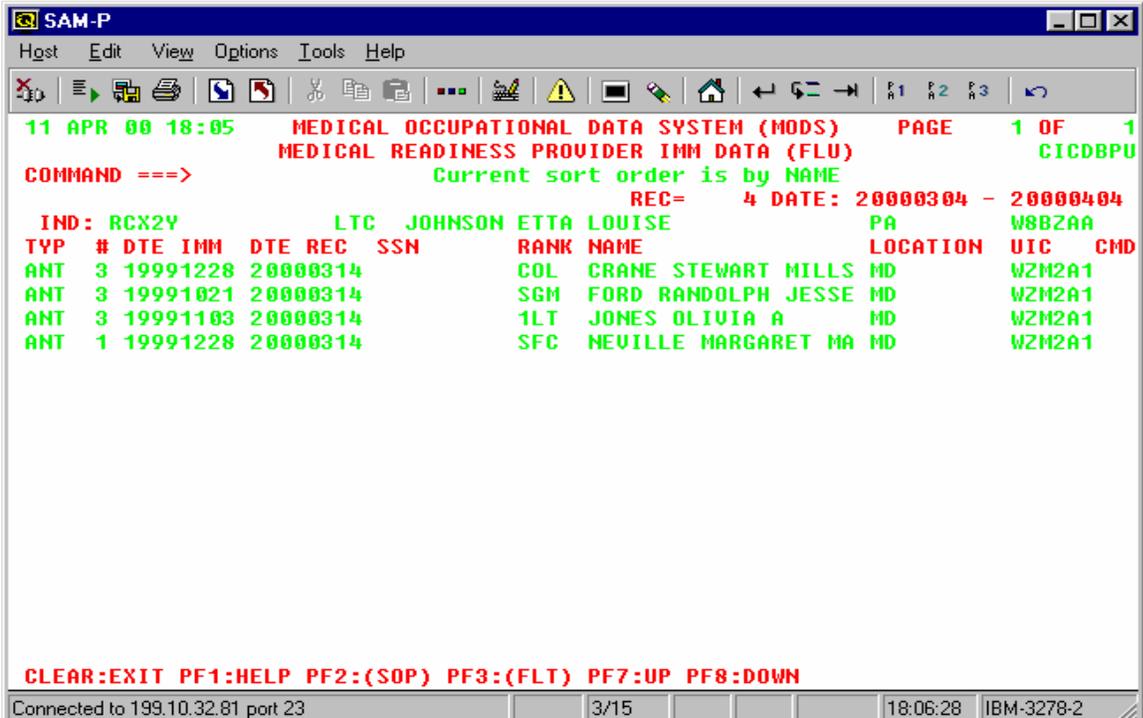

*Medical Readiness Immunization Provider Data (FLT)*

The resulting screen shows a list of all users who have entered immunizations administered at that zip code along with the number of immunizations posted. Under location you will notice that it shows that users current location. If you wanted to get users who are currently located at Ft. Meade, then you would enter Ft. Meade under location. This would bring up all users currently located at Ft. Meade who have entered in immunizations. By selecting any of the names listed you can view all the individuals who have had an immunization posted by that user.

*Click with the mouse on any of the users listed, and press <Enter>.*

# MEDPROS Immunization Tracking Module

*Medical Readiness Immunization Provider Imm Data (FLU)*

This screen shows a list of all individuals who have an immunization posted by the selected user during the given timeframe.

***Press <F3> to get back to the FLT screen to select another user  
or to get back to FLG.***

**Press <F3> to get back to FLG screen.**

# MEDPROS Immunization Tracking Module

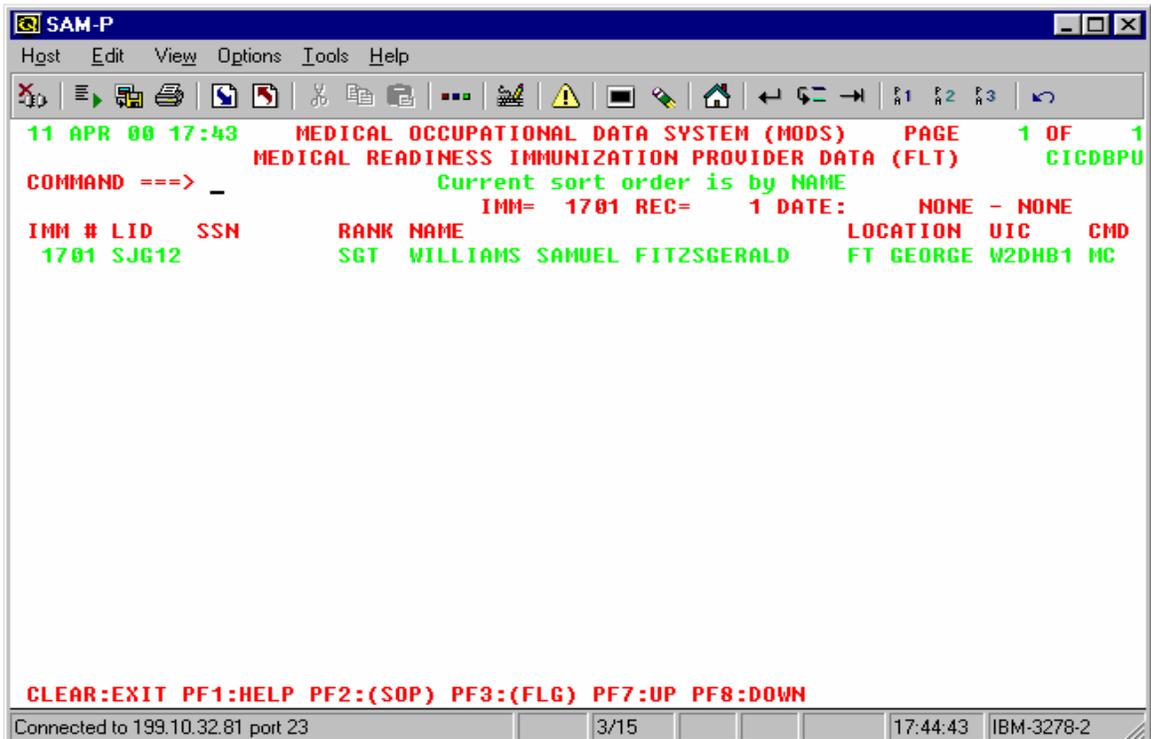

*Medical Readiness Log Module (FLG)*

In this training example, an individual logon ID has been entered. This will show just the individual selected and the total number of immunizations the user has posted. (Although not selected in this example, you may limit date posted shown to a specific timeframe by entering dates in the recording date fields).

***<TAB> down to MODS user SSN or logon ID and enter the users information.  
Tab down to FLT and type an "S" to select.***

# MEDPROS Immunization Tracking Module

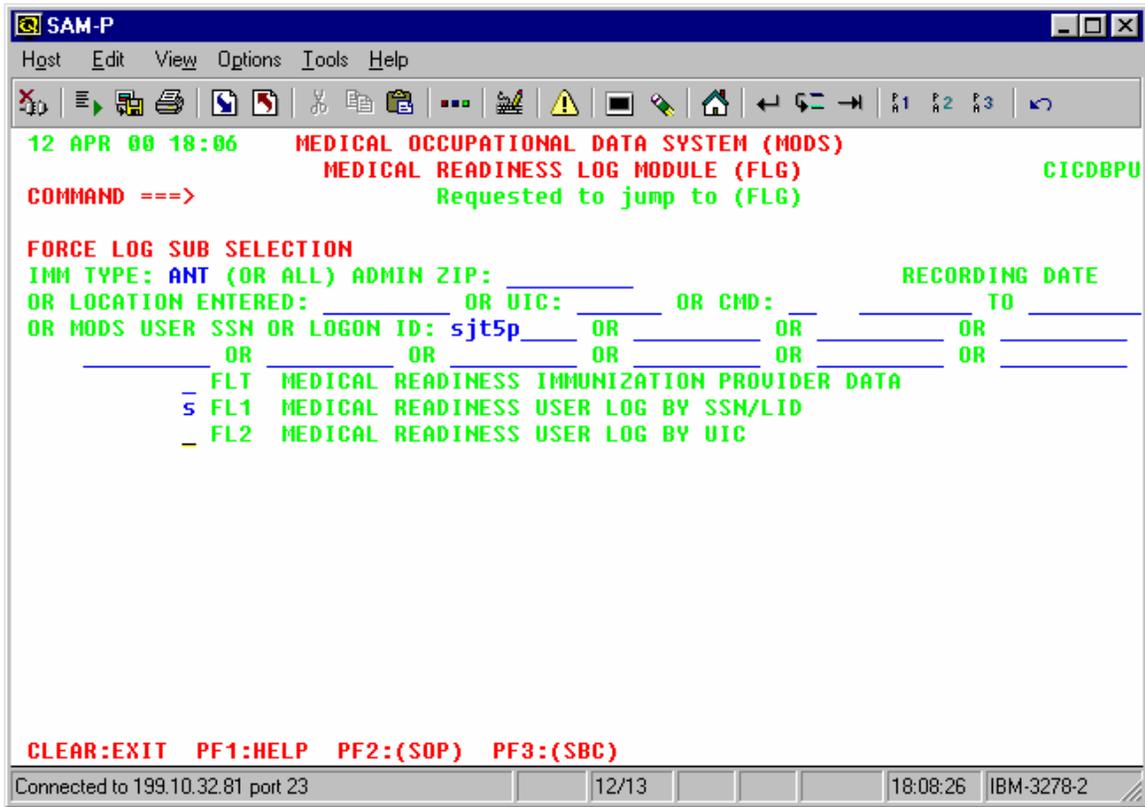

*Medical Readiness Immunization Provider Data (FLT)*

This screen shows the individual user selected and all immunizations posted. You may select a “Recording Date” to limit immunizations posted during the timeframe entered for that user. By using the <tab> key or mouse click, you can move the cursor to that individual and hit <enter> to see a list of the individuals who had immunizations posted by this user.

*To return to the <FLG> screen, press <F3>  
or if you want to go to the FRM screen type “=FRM”.*

# MEDPROS Immunization Tracking Module

*Medical Readiness Log Module (FLG)*

Using the FL1 option from this screen (FLG), the User Log Monitor is displayed, by SSN(s) or LID(s) for every CICS display accessed by that SSN/LID. It reports the number of times a user entered each CICS screen by month and a total of all entries in all months up to that point in time.

**<TAB> down and enter in a SSN/LID, <TAB> down to FL1,  
type an “S” for select, then press <ENTER>.**

Help for IMMUNIZATION SELECTION CRITERIA (FRR)

THIS SCREEN ALLOWS YOU TO FILL OUT IMPORTANT IMMUNIZATION TRACKING INFORMATION ONE TIME AND UPDATE MULTIPLE RECORDS WITH THE STROKE OF A KEY. ALL ENTRIES MADE HERE WILL AUTOMATICALLY TRANSFER TO THE INDIVIDUAL IMMUNIZATION RECORD OF EVERY SOLDIER RECEIVING THE IMMUNIZATION. ONCE THIS SCREEN IS FILLED OUT CORRECTLY, YOU WILL SELECT NAMES OFF A MODS ALPHA ROSTER. ALL NAMES SELECTED WILL BE UPDATED WITH THE STROKE OF A KEY. INFORMATION THAT HAS TO BE FILLED OUT CORRECTLY ON THIS SCREEN INCLUDE: TYPE OF VACCINE, DOSE AMMOUNT, ROUTE, MANUFACTURER CODE, LOT NUMBER, PHYSICIAN'S SSN, AND ZIP /APO CODE. OVERTYPE DATE IF POSTING OCCURS A DAY OR MORE AFTER ACTUAL IMMUNIZATIONS OCCUR (NO FUTURE DATES ACCEPTED)

HERE IS THE LIST OF MANUFACTURE CODES PROVIDED BY DEERS AND IN THE MODS TABLE 151 ON THE OVO SCREEN.

# **Appendix C – Exception Codes**

## MEDPROS Immunization Tracking Module

### Manual Input by Authorized MODS User

#### MEDICAL CODES

(Supporting documentation must be filed in SM medical record)

**MT (Medical Temporary)**: Duration: Expiration (YYYYMM)  
Pregnancy, hospitalization, events referred for medical consultation, temporary immune suppression, convalescent leave, pending medical evaluation board or in medical hold

**MR (Medical Reactive)**: Duration: I=Indefinite  
A permanent restriction from receiving additional doses of a specific vaccine. To be used only after severe adverse vaccine reaction. Such reactions must be reported to the FDA Vaccine Adverse Events Reporting System (VAERS). Mild, transient reactions involving soreness, redness, swelling, lumps, low grade fever or related symptoms should not be coded as MR. Events referred for medical consultation may be coded as MT.

**MP (Medical Permanent)**: Duration: I=Indefinite  
HIV positive, prolonged or permanent immune suppression  
Pre-existing Allergy, medical contraindication determined by physician  
For Tuberculosis: Positive Tuberculosis Skin Test

**MI (Medical Immune)**: Duration: I=Indefinite  
Positive titer, positive serology  
Not Susceptible - (for specific immunization) e.g. chicken pox, rubella prior to 1957

**MD (Medical Declined)**: Duration: I=Indefinite  
Declined by person for such reasons as religious waivers, declination of optional immunizations, etc.

**AP (Admin PCS)**: Duration: Up to 3 Months (YYYYMM)  
Permanent Change of Station

**AL (Admin Emergency Leave)**: Duration: Up to 1 Month  
Expiration Date in (YYYYMM)  
Emergency Leave

**AT (Admin Temporary)**: Duration: Up to 3 Months (YYYYMM)  
Absent without leave; Legal action pending (other than code AR)  
Temporary Duty Assignment (TDY) (max duration 30 days)

**AS (Admin Separation)**: Duration: I=Indefinite

## **MEDPROS Immunization Tracking Module**

Pending discharge or separation (typically within 60 days)

Retirement (typically within 180 days)

**AR (Admin Refusal)**: Duration: I=Indefinite

Any service member in UCMJ proceedings for failure to follow a direct order by their commander to take the vaccine (following an initial declination, re-education, and counseling by their chain of command).

**AM (Admin Missing)**: Duration: I=Indefinite

Missing in Action/Prisoner of War

**AD (Admin Deceased)**: Duration: I=Indefinite

Service member deceased

**NR (Not Required)**: Duration: I=Indefinite

Military personnel who received Anthrax immunizations while eligible and have since retired or ETS'd and now part of the GS work force or defense contractor not otherwise required to take the Anthrax vaccination.

**\* Note: Where appropriate, service members should NOT be allowed to PCS, attend school, or perform temporary duty without the required immunizations.**
